

ESOHTN team attends the 2012 ESOH Training Symposium

Snow was on the ground and training was in the air at the 2012 ESOH Training Symposium held in Denver, Colorado.

ESOHTN participated in the week-long event this February with booth presence and daily training sessions taught by our Customer Service Manager, Sarah Spalding. The training gave students an introductory look at the basics of ESOHTN and allowed them to navigate the system and ask questions in a live, hands-on session.

Our CEO, Nina Arcaro, presented a Technical Session entitled, “ESOHTN: Minimizing the Risks, Maximizing the Mission,” which demonstrated how the Air Force, Army, Navy, NASA and state and local government agencies are using ESOHTN to meet regulatory requirements, reduce operational costs and increase the effectiveness of their programs.

Overall, it was a great turnout and wonderful to see all of our clients and friends in person.

New Training Courses Added

Ten new courses have recently been added to our online training library!

ESOHTN is excited to announce some recent additions to your awareness training. Most of these new courses help fulfill the requirements of 29 CFR 1910.1001, OSHA’s Standards. Some topics covered include descriptions, health hazards, exposure, preventive measures and individual responsibilities.

- Aerospace NESHAP
- Asbestos Awareness
- Benzene Awareness
- Cadmium Awareness
- Chromium Awareness
- EESOH–MIS–Hazardous Materials
- Filtering Face Piece Devices
- Formaldehyde Awareness
- Lead Awareness
- Methylene Chloride Awareness

For information on any of the training courses, visit our [online training catalogue](#) now.

Course Development News

ESOHTN is unveiling four brand-new Sustainability Training Courses, available late this Summer.

These courses are being developed to provide a basic understanding of sustainability, the need to preserve and maintain the earth’s natural resources, and the efforts of governments and businesses to implement changes socially, environmentally and economically. Topics will include leadership roles, impact considerations, tools to measure success, and the framework used by organizations to become sustainable. Case studies and videos will also be incorporated for a more in-depth learning experience.

We’ll be announcing their arrival as soon as they become available. Watch our Twitter feed, Facebook page and Blog for updates!

Spring Support Tip

Do you know how to update your ESOHTN training plan?

It’s easy. Simply click *Training Plan* and scroll to the bottom of the page. Then, click *Update Training Plan*, where you’ll be routed to a page that will allow you to update your plan with a new job code or any new or additional duties. Any training that you have previously taken will still be displayed under the *Test Results* page and on your ESOHTN certificate.

And remember, if you have any questions or need any assistance, feel free to contact us as support@esohtn.com.

We are always happy to help!
