## Training Additions!

We are continually adding and developing new modules to help you with your training needs. Below are our latest additions into the training library:

- **HAZWOPER: First Responder Awareness Video Training**—Overview of the duties of the first responder in a hazardous materials accident. Features a video addressing the information that a first responder should obtain before calling the emergency dispatcher.

- **Spill Response: Non-Emergency HAZMAT Video Training**—Overview of procedures for various spill situations. Features a video that reviews HAZMAT spill discovery and assessment, non–HAZWOPER spill response, and incidental release cleanup procedures.

Check out **our catalogue** now for a complete list of training options.

## Spotlight on Kirtland AFB

Kirtland AFB recently underwent training for their external ESOHCAMP and used ESOHTN as their training tool.

Kirtland informed us that our system was instrumental in providing base–wide EMS awareness training, which is a requirement for their EMS and an important part of preparing for their ESOHCAMP.

Kirtland also used ESOHTN for easy tracking of training records and even maintaining records for those who have transferred. In addition, our modules and tests helped their program managers provide training for various levels of users and job descriptions.

*Having an online, easily–tracked training network is a great resource, and having this resource available to all base personnel was extremely helpful during our most recent external ESOHCAMP.*

ESOHTN is a great tool for any of your training requirements. **Contact us** or visit our website to see how we can help you!

## Overseas Training

Environmental requirements for DoD facilities overseas are different and can be stricter than those within the U.S. That's why ESOHTN has training specifically for DoD facilities located abroad.

DoD developed Environmental Governing Standards for facilities located in countries such as Korea, Italy, Greece, and Spain, to name a few. ESOHTN provides the customized training needed to help comply with these standards, translated into the language of the country you may require.

For those countries which don't have Environmental Governing Standards, the Overseas Environmental Baseline Guidance Document applies. ESOHTN also offers customized training for the OEBGD.

If you have questions regarding your overseas training requirements and how we can help, email us at **support@esohtn.com**.

## Did You Know?

Have you noticed new and updated pages on esohtn.com? We've given some of your pages fresh, new looks complete with the addition of new command logos and matching banners.

We strive to keep your sites up–to–date and to your liking. Let us know if your site requires any updates by contacting us at **support@esohtn.com.**

## Fall Support Tip

Did you know that 98% of support requests are from users who have forgotten their login information?

If this happens to you, simply click the HELP link on the login page. You'll be prompted to enter your email address so your login information can be emailed to you.

If your email address has changed, let us know at **support@esohtn.com** so we can be sure to send it to the right place.

## Construction Contractor Training

Have you checked out our Construction Contractor Training yet? ESOHTN offers Contractor Training in Operations, Environmental, Safety and Occupational Health.

Visit our updated **Contractor Training Catalogue** to view a complete list of training now.

## Welcome New Clients!

We'd like to give a big welcome to all of our new users at Pease Air National Guard Base, Malmstrom AFB and F.E. Warren AFB.

Welcome, everyone, to the ESOHTN family!

Are you *social*? So are we! Follow us on Twitter, "like" us on Facebook and visit our Blog. Now it's even faster and easier to stay up–to–date on all things ESOHTN!
