

# 2024 COURSE CATALOG

# TABLE OF CONTENTS

## Introduction

## Course Descriptions

2021 Oil Handlers Training: NSA Annapolis  
Aerospace NESHAP  
Affirmative Procurement  
Air/Emissions  
Air/Emissions for Unit Environmental Coordinators  
Aircraft Maintenance  
Air Force Environmental Awareness  
Air Force Environmental Management Information System (AF-EMIS)  
Air Force Lead-Based Paint  
Air Quality Shop Level Training: Keesler AFB - **INCLUDES AUDIO!**  
Amalgam Effluent Process and Training: Naval Medical Center Portsmouth  
As Low As Reasonably Achievable (ALARA)  
Arc Flash Personal Protective Equipment  
Asbestos  
Asbestos Awareness  
Asbestos Awareness: In-depth 3 part training  
Assignment of Unit Environmental Coordinator  
Benzene Awareness  
Boiler Combustion Optimization and Operator Training (Parts 1-11)  
Brick or Block Masonry  
Brown Tree Snakes  
Building, Construction, Demolition or Renovation  
Cadmium Awareness  
Carpentry  
Chromium VI Awareness  
Civil Engineering Material Acquisition System (CEMAS)  
Civil Engineering Material Acquisition System (CEMAS): Introduction  
Civil Engineering Material Acquisition System (CEMAS): User Rights  
Civil Engineering Material Acquisition System (CEMAS): Fund Cites and Organization Codes  
Civil Engineering Material Acquisition System (CEMAS): Variables  
Civil Engineering Material Acquisition System (CEMAS): (How to) Add a Noun  
Civil Engineering Material Acquisition System (CEMAS): (New) Noun Maintenance  
Civil Engineering Material Acquisition System (CEMAS): Material Requisitions, Part 1  
Civil Engineering Material Acquisition System (CEMAS): Material Requisitions, Part 2  
Civil Engineering Material Acquisition System (CEMAS): Award Purchase Order  
Civil Engineering Material Acquisition System (CEMAS): Receive Item

Civil Engineering Material Acquisition System (CEMAS): Assign Holding Area  
Civil Engineering Material Acquisition System (CEMAS): Material Complete Notification  
Civil Engineering Material Acquisition System (CEMAS): GPC Purchase, Part 1  
Civil Engineering Material Acquisition System (CEMAS): GPC Purchase, Part 2  
Civil Engineering Material Acquisition System (CEMAS): Store Maintenance Main Store  
Civil Engineering Material Acquisition System (CEMAS): Store Maintenance Forward Store  
Civil Engineering Material Acquisition System (CEMAS): Store Maintenance Store Reorder  
Civil Engineering Material Acquisition System (CEMAS): Material Issue  
Civil Engineering Material Acquisition System (CEMAS): Non–CEMAS GPC Purchase  
Civil Engineering Material Acquisition System (CEMAS): Material Returns  
Civil Engineering Material Acquisition System (CEMAS): On Hand Material Transfer  
Civil Engineering Material Acquisition System (CEMAS): Non–Material GPC Purchase  
Civil Engineering Material Acquisition System (CEMAS): Bill of Material (BOM) Close-Out  
Civil Engineering Material Acquisition System (CEMAS): GPC Reconciliation  
Civil Engineering Material Acquisition System (CEMAS): Material Distribution  
Civil Engineering Material Acquisition System (CEMAS): DLA—Prime Vendor Interface, Part 1  
Civil Engineering Material Acquisition System (CEMAS): DLA—Prime Vendor Interface, Part 2  
Civil Engineering Material Acquisition System (CEMAS): SBSS—Standard Base Supply System Interface  
Civil Engineering Material Acquisition System (CEMAS): Funds Flow and Monitoring  
Civil Engineering Material Acquisition System (CEMAS): Inventory Adjustments, Part 1  
Civil Engineering Material Acquisition System (CEMAS): Inventory Adjustments, Part 2  
Civil Engineering Material Acquisition System (CEMAS): Work Flow  
Civil Engineering Material Acquisition System (CEMAS): Transaction History File  
Civil Engineering Material Acquisition System (CEMAS): Monthly Management Summary  
Civil Engineering Material Acquisition System (CEMAS): Material Acquisition Workload, Part 1  
Civil Engineering Material Acquisition System (CEMAS): Material Acquisition Workload, Part 2  
Civil Engineering Material Acquisition System (CEMAS): End of Session (EOS) Processing, Part 1  
Civil Engineering Material Acquisition System (CEMAS): End of Session (EOS) Processing, Part 2  
Civil Engineering Material Acquisition System (CEMAS): End of Session (EOS) Products  
Command Duty Officer (CDO) Environmental Training I  
Command Duty Officer (CDO) Environmental Training II  
Confined Spaces Awareness  
Conservation  
Contractor: Installation Specific Environmental Requirements  
Contractor: Marine Coating Operations  
Corrosion Control  
Digging in the Ground  
Diversity of Amphibians and Reptiles in the United States - **INCLUDES AUDIO!**  
DOT HAZMAT Regulations  
Drinking Water  
Drinking Water: Revised Total Coliform Rule - **INCLUDES AUDIO!**  
Drinking Water: Public Notification Rule and the Consumer Confidence Report Rule - **INCLUDES AUDIO!**  
EESOH–MIS–Hazardous Materials  
Electrical

Emergency Generators: Combustion Optimization and Operator Training: In-depth 10 part Training - Maryland  
Emergency Generators: Combustion Optimization and Operator Training: In-depth 10 Part Training - NSA Washington -  
Emergency Planning and Community Right-to-Know Act (EPCRA)  
Environmental Awareness and Environmental Management System Training: Navy Region Southwest  
Environmental Compliance and Enforcement  
Environmental (EV) Checklist Training: NSA Philadelphia and Philadelphia Navy Yard Annex - **NEW!**  
Environmental Justice (EJ)  
Environmental Management System (EMS)  
Environmental Management System (EMS) Practitioner  
Environmental Management System (EMS) Practitioner: Introduction  
Environmental Management System (EMS) Practitioner: Environmental Policy, EMS Scope and the Cross  
Functional Team  
Environmental Management System (EMS) Practitioner: Identifying Aspects  
Environmental Management System (EMS) Practitioner: Scoring Environmental Impacts  
Environmental Management System (EMS) Practitioner: Environmental Objectives and Targets  
Environmental Management System (EMS) Practitioner: Environmental Management Plans  
Environmental Management System (EMS) Practitioner: Monitoring and Measurement  
Environmental Management System (EMS) Practitioner: EMS Assessment  
Environmental Management System (EMS) Practitioner: Records Management  
Environmental Management System (EMS) Practitioner: Management Review and Maintaining Your EMS  
Environmental Laws and Liability  
Environmental Sustainability Training: Awareness  
Environmental Sustainability Training: Foundation for Establishing a Sustainable Organization  
Environmental Sustainability Training: Sustainability Implementation  
Environmental Sustainability Training: Sustainability Leaders  
ESOH CAMP for Unit Environmental Coordinators  
Essential Fish Habitat Policy Revision and Application  
Ethics for Environmental Professionals  
Facility Manager  
Fall Protection  
Filtering Face Piece Device  
Fire Alarm System Repair  
Fire Protection for Unit Environmental Coordinators  
Formaldehyde Awareness  
Fuels Operator  
General Environmental Compliance Information - **NEW & IMPROVED!**  
General Inventory and Monitoring Techniques for Herpetofauna - **INCLUDES AUDIO!**  
General Labor  
Hazard Communication (HAZCOM) - **INCLUDES AUDIO!**  
Hazardous Materials  
Hazardous Materials Management for Unit Environmental Coordinators  
Hazardous Material Spills for Unit Environmental Coordinators  
Hazardous Materials Storage Practices  
Hazardous Properties

Hazardous Waste Compatibility  
Hazardous Waste Generator Training: NSA Philadelphia and Philadelphia Navy Yard Annex - **NEW!**  
Hazardous Waste Identification  
Hazardous Waste Management  
Hazardous Waste Management for Unit Environmental Coordinators  
HAZMAT Shelf-Life Management Program for Unit Environmental Coordinators  
HAZWOPER: First Responder Awareness Video Training  
Heavy Metal Awareness Training: NAS Whidbey Island  
Herbicide Applicator  
Historic Properties for Facility Managers  
Hunting and Fishing: Regulations and Restrictions  
Installing Carpet or Tile  
Integration of the Globally Harmonized System (GHS) - **INCLUDES AUDIO!**  
Introduction to Amphibians and Reptiles - **INCLUDES AUDIO!**  
Introduction to Climate Change  
Introduction to Drinking Water: In-depth 9 part training  
Introduction to Drinking Water Systems: In-depth 6 part training  
Landfill Operations  
Lead and Copper Rule  
Lead Awareness  
Lead-Based Paint  
Least Terns for Contractors  
Lockout/Tagout (LOTO): Awareness  
Lockout/Tagout (LOTO): Air Force  
Locksmithing  
Machining  
Medical Waste Management  
Methylene Chloride Awareness  
MS4: Stormwater Basic Information - **INCLUDES VIDEO!**  
Municipal Maintenance Activities: Municipal Separate Storm Sewer System (MS4) Maintenance BMPs  
NAS Lemoore Stormwater Training: Aircraft Operations and Maintenance and Ground Support Equipment  
NAS Lemoore Stormwater Training: Fuel Farm and Fuel Skids  
NAS Lemoore Stormwater Training: Industrial Wastewater Treatment Plant  
NAS Lemoore Stormwater Training: Public Works and Transportation  
Natural and Cultural Resources  
Natural Resource Program Overview: NAS Sigonella - **NEW!**  
Natural Resource Program Overview: NS Rota - **NEW!**  
Natural Resource Program Overview: NSA Bahrain - **NEW!**  
Natural Resource Program Overview: NSA Souda Bay - **NEW!**  
Natural Resource Program Overview: NSF Redzikowo - **NEW!**  
National Environmental Policy Act (NEPA)  
National Environmental Policy Act (NEPA) Compliance for Unit Environmental Coordinators  
Natural Resource Program Overview: NSA Bahrain - **INCLUDES AUDIO!**  
Natural Resource Program Overview: NSA Souda Bay - **INCLUDES AUDIO!**

Naval Air Weapons Station China Lake: General EMS and Environmental Awareness Training: In-depth 4 part training

Naval Base Kitsap Environmental Awareness Training

Navy Environmental Management System (EMS) Awareness: Installation Commanding Officers & Executive Officers

Noise Management

NSA Crane Hazardous Waste Generator Training

NSAB Emergency Generators: Combustion Optimization and Operator Training: In-depth 10 Part Training

NSE Environmental Work Center Coordinator Initial Training: Modules 1-7 (Naval Station Everett)

NUWCDIVNPT Environmental Awareness Training

Oil/Water Separators

Operating Heavy Equipment

Overview of Environmental Compliance

Ozone Depleting Substances (ODS)

Painting

Pharmaceutical Waste Management: Naval Medical Center Portsmouth

PHNSY and IMF Code 106 Occupational Health, Safety and Environmental Brief

Plumbing and Pipe Fitting

Polychlorinated Biphenyls (PCBs) Management

Personal Protective Equipment (PPE)

Pesticides

Petroleum, Oils and Lubricants (POL) Management

Pollution Control

Pollution Prevention (P2)

PPV Environmental Training Series: In-depth 16 part training - **SOME MODULES NOW INCLUDES AUDIO!**

Project Manager

Radon Assessment and Mitigation Program Training: In-depth 9 part training

RCRA Annual Refresher: Introduction

RCRA Annual Refresher: DOT HAZMAT Regulations

RCRA Annual Refresher: Environmental Laws and Liability

RCRA Annual Refresher: Hazardous Properties

RCRA Annual Refresher: Hazardous Waste Compatibility

RCRA Annual Refresher: Hazardous Waste Identification

RCRA Annual Refresher: Personal Protection Equipment (PPE)

RCRA Annual Refresher: Standards Applicable to Generators

Recurring Work Program (RWP)

Recycling

Refrigerants

Regulatory Compliance Training for Firefighter Training Unit

Regulatory Compliance Training for Power Plant and Oily Waste Treatment Facility (OWTF)

Regulatory Compliance Training for Washrack Operation

Road, Parking Lot or Airfield Paving

Roofing

Safety Manager

Self-Help Pest Management Training: Nuisance Pests - **INCLUDES AUDIO!**

Self-Help Pest Management Training: Stinging Insects - **INCLUDES AUDIO!**

Self-Help Vegetation Management Training - **INCLUDES AUDIO!**

Sheet Metal Work

Sheetrock Hanging and Finishing

Small Engine Maintenance

Solid Waste

Spill Prevention Control and Countermeasures (SPCC)

Spill Prevention, Control, and Countermeasure Training: OSO Dresden

Spill Response: Non-Emergency HAZMAT Video Training

Standards Applicable to Generators

Storage Tanks

Stormwater: Basic Information

Stormwater: Comprehensive Overview

Stormwater: Erosion and Sediment Control

Stormwater—Honolulu: Stormwater Overview

Stormwater—Honolulu: The City and County of Honolulu's SWMP

Stormwater—Honolulu: Stormwater Best Management Practices Planning

Stormwater—Honolulu: Design Considerations for Post-Construction BMPs: Selection Process

Stormwater—Honolulu: Design Considerations for Post-Construction BMPs: Site Planning and Design BMPs

Stormwater—Honolulu: Design Considerations for Post-Construction BMPs: Source Control BMPs

Stormwater—Honolulu: Design Considerations for Post-Construction BMPs: Treatment Control BMPs

Stormwater—Honolulu: Design Considerations for Post-Construction BMPs: Plan Review, Documentation, Operations and Maintenance Plans

Stormwater—Honolulu: Design Considerations for Construction BMPs: Plans, Permits and Site Requirements

Stormwater—Honolulu: Design Considerations for Construction BMPs: Selection Process

Stormwater—Honolulu: Design Considerations for Construction BMPs: Erosion and Wind Controls

Stormwater—Honolulu: Design Considerations for Construction BMPs: Sediment Controls

Stormwater—Honolulu: Design Considerations for Construction BMPs: Tracking Controls and Good Housekeeping

Stormwater—Honolulu: Inspection Considerations for Construction BMPs: Plans, Permits and Site Requirements

Stormwater—Honolulu: Inspection Considerations for Construction BMPs: Correct Installation and Maintenance of Common Site BMPs

Stormwater—Honolulu: Inspection Considerations for Construction BMPs: Inspection and Enforcement Procedures

Stormwater—Honolulu: Municipal Maintenance Activities: Good Housekeeping

Stormwater—Honolulu: Municipal Maintenance Activities: Illicit Discharges and Illegal Connections

Stormwater—Honolulu: Municipal Maintenance Activities: Landscape Maintenance BMPs

Stormwater—Honolulu: Municipal Maintenance Activities: Municipal Separate Storm Sewer System (MS4)

Maintenance BMPs

Stormwater—Honolulu: Municipal Maintenance Activities: Pavement Maintenance BMPs

Stormwater—Honolulu: Municipal Maintenance Activities: Spill Management

Stormwater—Honolulu: Municipal Maintenance Activities: Vehicle and Equipment Maintenance BMPs

Stormwater General Awareness

Stormwater Low Impact Development (LID)

Storm Water Pollution Prevention Training

Submarine Maintenance

Sustainable Environmental Management (SEM)

Sustainable Procurement Program (SPP) Awareness - **INCLUDES AUDIO!**  
Threats to Amphibians and Reptiles - **INCLUDES AUDIO!**  
Unit Environmental Coordinator (UEC)  
Universal Waste  
Used Oil and Organizational Tank Custodian  
UST Class A/B Certification Training: In-depth 9 part training - **NEW STATES ADDED!**  
UST Class A/B Certification Training: In-depth 11 part training - **NEW STATES ADDED!**  
UST Class A/B Preparatory Program: In-depth 9 part training  
UST Class C Certification Training: 5 part training - **NEW STATES ADDED!**  
Utility Plant Air Compliance Training  
Vehicle Control Officer (VCO)  
Vehicle Maintenance  
Waste Management Guidelines  
Waste Management Guidelines for HVAC Waste  
Waste Management Guidelines for Aircraft Maintenance Waste  
Waste Management Guidelines for Building Construction Waste  
Waste Management Guidelines for Building Demolition Waste  
Waste Management Guidelines for Building Maintenance Waste  
Waste Management Guidelines for Building Renovation Waste  
Waste Management Guidelines for Carpet and Tile Installation Waste  
Waste Management Guidelines for Carpentry Waste  
Waste Management Guidelines for Electrical Waste  
Waste Management Guidelines for Fire Alarm System Repair Waste  
Waste Management Guidelines for Laboratory and Pharmacy Waste  
Waste Management Guidelines for Landscaping Waste  
Waste Management Guidelines for Paint Waste  
Waste Management Guidelines for Small Engine Repair Maintenance Waste  
Waste Management Guidelines for Submarine Maintenance Waste  
Wastewater  
Wastewater Regulatory Compliance Training: SUBASENLON Fire Department  
Water  
Welding  
Wetlands  
Wetlands General Awareness  
Window Glazing

## *Welcome to Our Catalog of Online Training*

This 2024 catalog provides an overview of the large inventory of online training we have to offer for Environmental, Safety, and Occupational Health education. All training shown in our comprehensive list is designed and built according to our clients' specific needs, and can be customized for any organization's structure or individual requests.

All of our training is web-based and available 24/7/365 for your ease and convenience. *Take your training when you like—where you like!* Plus, most courses in this state-of-the-art Learning Management System are designed to be completed in under 20 minutes, giving you training at a fraction of the cost and lost man hours of other training options.

You will see that each course offers a detailed description of what is entailed, customized versions already available and an approximation of time required to complete the course. After each course is an assessment to test your understanding of the material and a certificate of completion once the training is passed. Images, graphs, audio, video, and additional links are included within the training material to further strengthen the learning process.

All training within this catalog is also available for further customization. We want to meet your organization's unique needs and welcome additional training development requests.

Contact us for more information on how you can get started today.

**Call 1.866.730.4253 or email [sales@ecatts.com](mailto:sales@ecatts.com).**

---

## TRAINING DESCRIPTIONS

This section contains descriptions of our online training courses. All courses are offered as listed below and are also available in customized formats to fit your organization's needs.

### **2021 OIL HANDLERS TRAINING: NSA ANNAPOLIS**

The intent of this training is to meet the 40 CFR 112.7(f)(1) training requirement for all facility oil handling personnel on the installation. It covers governing regulations, the SPCC Plan, the Spill Contingency Plan (SCP), and discharge procedure protocols.

*versions: Installation Specific*

*average completion time: 20 minutes*

### **AEROSPACE NESHAP**

This training series consists of six courses and is a familiarization with the air pollution regulation known as "Aerospace NESHAP" (National Emission Standard for Hazardous Air Pollutants). Training is targeted towards managers, operators, paint supervisors, and anyone else whose daily functions might be affected by NESHAP regulations.

*versions: Installation Specific*

*average completion time: 2 hours*

### **AFFIRMATIVE PROCUREMENT**

Targeted towards personnel with jobs that include purchasing and project planning, this course provides an overview of affirmative procurement, its requirements, exemptions and EPA designated items.

*versions: General, General Overseas, Greece, Japan, Korea, Alabama*

*average completion time: 10 minutes*

### **AIR/EMISSIONS**

This course offers an overview of air and emissions regulations, regional haze, general air pollutant information, air permit requirements, types of air emissions sources, and hazardous air pollutants.

*versions: AL, AK, AR, AZ, CA, CO, CT, DE, DC, FL, GA, Greece, Guam, Navy, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, SC, SD, Spain, TN, TX, United Kingdom, Air Force, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

### **AIR/EMISSIONS FOR UNIT ENVIRONMENTAL COORDINATORS**

This training is targeted towards Unit Environmental Coordinators (UECs) who must comply with air quality rules and regulations. Overview covers the responsibilities of the UEC, as well as information on the reduction of emissions of particulate matter and fugitive emissions.

*versions: General, Japan, Korea, United Kingdom*

*average completion time: 10 minutes*

## **AIRCRAFT MAINTENANCE**

Designed to target personnel who perform aircraft maintenance activities, this offers a brief awareness training of the environmental rules and regulations that meet safety compliance.

*versions: DoD, General Overseas, Greece, Italy, Japan, Korea, Spain, United Kingdom*

*average completion time: 5 minutes*

## **AIR FORCE ENVIRONMENTAL AWARENESS**

This is an overview of how everyday work decisions impact the environment and overall quality of life. This module reviews and explains the importance of being in environmental compliance at your work site. Further, it covers the importance of ESOHTN training, the key environmental legislation that governs work activities, common compliance violations, the inspection process, violation enforcement actions, and ECAMP.

*versions: Air Force*

*average completion time: 20 minutes*

## **AIR FORCE ENVIRONMENTAL MANAGEMENT INFORMATION SYSTEM (AF-EMIS)**

This in-depth series of 20 training courses provides a familiarization with the AF-EMIS, the Air Force Hazardous Material Management Process (HMMP), and the relationship between the two. This series targets personnel who authorize, procure, issue, use or dispose of HAZMAT materials and those who manage, monitor or track any HAZMAT processes. Topics covered include awareness, identification and management of Hazardous Materials, and overall responsibilities and duties.

*versions: Air Force*

*average completion time: 5 hours*

## **AIR FORCE LEAD-BASED PAINT**

This is a comprehensive overview of Lead and Lead-Based Paint. This module reviews the uses of lead, what it is and why it is found in paint, laws and Executive Orders, problems with lead-based paint, health effects in children and adults, ways to reduce potential health effects from lead, Air Force LBP policy, Air Force Functional Area responsibilities, USAF Base LBP Program, LBP Testing, abatement and cleanup, certifications to conduct work with LBP, Toxic Substances Control Act, Resource Conservation and Recovery Act, and lead-based paint and OSHA.

*versions: Air Force*

*average completion time: 60 minutes*

## **AIR QUALITY SHOP LEVEL TRAINING: KEESLER AFB**

Created for Keesler AFB, this training covers air pollution and air pollution sources. It educates shop level workers on the criteria for mobile, stationary, major, and minor sources of air pollution as defined by the Clean Air Act, and includes information on AFI 32-7040 and MDEQ requirements. The training presents information on specific air pollution sources, including abrasive blasting operations, external combustion equipment, firing ranges, fuel cell maintenance, fuel dispensing, fuel storage tanks, ODSs, pesticide usage, parts cleaners, stationary internal combustion equipment, surface coating operations, and woodworking equipment.

*versions: Keesler AFB (Includes audio)*

*average completion time: 20 minutes*

## **AMALGAM EFFLUENT PROCESS AND TRAINING: NAVAL MEDICAL CENTER PORTSMOUTH - NEW!**

This training is intended for all personnel aboard Naval Medical Center Portsmouth and its branch clinics who generate or

have the potential to generate amalgam waste. This training provides guidance concerning EPA's best management practices to ensure that amalgam waste is collected and shipped to a certified recycler in a systematic and accountable manner thus fulfilling amalgam waste collection and recycling requirements.

*versions: Installation Specific*

*average completion time: 25 minutes*

### **AS LOW AS REASONABLY ACHIEVABLE (ALARA)**

This course provides information on minimizing exposure to occupationally occurring ionizing radiation. Overview includes review of the ALARA principle, sources and types of radiation, effects and risks, measures to minimize exposure, procedures for radiation emergencies, and the personnel dosimetry program.

*versions: Air Force*

*average completion time: 25 minutes*

### **ARC FLASH PERSONAL PROTECTIVE EQUIPMENT**

This course focuses on arc flash and PPE safety and methods used for determining arc flash PPE requirements.

*versions: Air Force*

*average completion time: 15 minutes*

### **ASBESTOS**

Targeting personnel who perform activities that may encounter asbestos, this training provides an overview of asbestos information, federal regulations, projects affected by asbestos law, asbestos containing material, inspections, notification requirements, and information on the removal and disposal of asbestos.

*versions: AL, AK, AZ, AR, Bahrain, CA, CO, CT, DoD, DE, DC, FL, GA, General Overseas, Greece, Guam, Navy, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

### **ASBESTOS AWARENESS**

Targeted towards all employees who are potentially exposed to asbestos in the work area, this training helps fulfill the requirements of 29 CFR 1910.1001, OSHA's Asbestos Standard. Topics covered include definitions and descriptions of asbestos, common uses, routes of exposure, health hazards, signs and symptoms of exposure, preventative measures for exposure, supervisor responsibilities, and employee responsibilities.

*versions: Installation Specific*

*average completion time: 10 minutes*

### **ASBESTOS AWARENESS TRAINING: 3 PART SERIES**

Provides an overview of how to identify and avoid exposure to asbestos, as well as asbestos training requirements and regulations. Specifically, these modules cover how to identify various forms of asbestos, adverse health effects due to asbestos exposure, effects of combining asbestos exposure and smoking, the Asbestos Medical Surveillance Program, various building materials that may contain asbestos, and building management control options. Additional information on the purpose and proper use of respirators, other Personal Protective Equipment (PPE) and protective control options, decontamination procedure, and hygiene facilities and practices is also included. The final module concludes by educating on housekeeping procedures, waste disposal, air quality monitoring, asbestos fiber release episodes, PELs, OSHA and EPA regulations and training.

*versions: General*

*average completion time: 20 minutes for each module*

## **ASSIGNMENT OF UNIT ENVIRONMENTAL COORDINATOR**

Designed for Air Force Unit Environmental Coordinators, this course covers the requirements, selection and tenant units, as well as overall guidelines on assigning the Unit Environmental Coordinator.

*versions: Air Force*

*average completion time: 10 minutes*

## **BENZENE AWARENESS**

Targeted towards all employees who are potentially exposed to benzene in the work place, this training helps fulfill the requirements of 29 CFR 1910.1028, OSHA's Benzene Standard. Topics include the definitions and descriptions of benzene, common uses, routes of exposure, health hazards, signs and symptoms of exposure, preventative measures for exposure, and supervisor and employee responsibilities.

*versions: Installation Specific*

*average completion time: 10 minutes*

## **BOILER COMBUSTION OPTIMIZATION AND OPERATOR TRAINING (PARTS 1-11)**

This is an 11 part series that informs and provides general guidance to boiler operators about safety, boiler combustion, NOx Control Technologies, boiler efficiency, boiler combustion optimization, and regulatory and operational requirements. The curriculum trains and targets Boiler Operators, Steam Plant Managers, Maintenance personnel, facilities engineers, contractors, anyone whose duties require them to interact with boilers.

*versions: NSA Bethesda*

*average completion time: 15 minutes for each module*

## **BRICK OR BLOCK MASONRY**

This course offers a brief overview of the environmental requirements, rules and regulations for personnel who perform brick and block masonry activities. Topics covered include overall environmental and human safety.

*versions: DoD, General Overseas, Greece, Japan, Korea*

*average completion time: 5 minutes*

## **BROWN TREE SNAKES**

Designed specifically for those living and working in Guam, this course educates on the problems resulting from the rapid spread of this invasive species on Guam and other Pacific Islands. Topics include general information on identifying the Brown Tree Snakes (BTS) and how to prevent the spread and infestation of other areas by incidental transport in aircraft and cargo.

*versions: Guam*

*average completion time: 20 minutes*

## **BUILDING, CONSTRUCTION, DEMOLITION OR RENOVATION**

Training for this course covers environmental requirements that affect building, construction, demolition, or renovation jobs and activities, as well as construction and demolition waste considerations, lead-based paint surfaces and how to prepare for solid waste inspection.

*versions: Air Force, DoD, General Overseas, Greece, Italy, Japan, Korea, Navy, PACAF, Spain, United Kingdom, USA,*  
*average completion time: 5 minutes*

## **CADMIUM AWARENESS**

Targeting those who are potentially exposed to cadmium in the work place, this training helps fulfill the requirements of 29 CFR 1910.1027, OSHA's Cadmium Standard. Topics include definitions and descriptions of cadmium, common uses, routes of exposure, health hazards, signs and symptoms of exposure, preventative measures for exposure, and supervisor and employee responsibilities.

*versions: Installation Specific*  
*average completion time: 10 minutes*

## **CARPENTRY**

Designed specifically for personnel who perform carpentry activities, this course provides a brief awareness of compliance requirements relating to environmental rules and regulations.

*versions: Bahrain, DoD, General, General Overseas, Greece, Japan, Korea, Spain, United Kingdom*  
*average completion time: 5 minutes*

## **CHROMIUM VI AWARENESS**

This training helps fulfill the requirements of 29 CFR 1910.1026, OSHA's Chromium VI Standard. Designed for employees who are potentially exposed to Chromium VI in the work place, this course covers the definitions and descriptions of Chromium VI, common uses, routes of exposure, health hazards, signs and symptoms of exposure, preventative measures for exposure, and supervisor and employee responsibilities.

*versions: Installation Specific*  
*average completion time: 10 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS)**

This is an in-depth training series consisting of 39 courses that provide an overview of how to use CEMAS. Targeting new and existing CEMAS users, this training covers user rights, fund cites and organization codes, variables, how to add a noun, new noun maintenance, material requisitions, award purchase order, receive item, assign holding area, material complete notification, CPPG purchase, store maintenance main store, store maintenance forward stores, store maintenance store reorder, material issue, non CEMAS GPC purchase, material returns, on hand material transfer, non material GPC purchase, Bill of Material (BOM) close-out, GPC reconciliation, material distribution, prime vendor interface, Standard Base Supply System (SBSS) interface, funds flow and monitoring, inventory adjustments, work flow, transaction history file, monthly management summary, material acquisition workload, END of Session (EOS) processing, and end of session products.

*versions: Air Force*  
*average completion time: 12 hours*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): INTRODUCTION**

The first of the courses, this "what" and "how" introductory training covers the welcome and general menu options for CEMAS.

*versions: Air Force*  
*average completion time: 10 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): USER RIGHTS**

This course covers the CEMAS identification process and CEMAS user rights. Topics covered include initial assignment, adding identification records, data field review, security access codes, and modifying or deleting a record.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): FUND CITES AND ORGANIZATION CODES**

This training teaches how to load funding documents into CEMAS, as well as adding an organization code, the two types of funding documents, and attaching funds to the PFMR or FCA record.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): VARIABLES**

This course provides an overview of the CEMAS Base Variable Records, including options on the Base Variables Options screen, how to add/delete/modify Base Variable Records, how to obtain an Audit Key, how to update the base address, and how to add or update the printer variables.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): (HOW TO) ADD A NOUN**

This training offers an overview of how to add items the Noun Dictionary, “what” the Noun Dictionary is, accessing a Noun Record, adding a Noun Record, adding adjectives and synonyms, and the Noun Addition and Research Screen.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): (NEW) NOUN MAINTENANCE**

This training offers an overview of “what” the Noun Dictionary is, how it works, how to find/modify an item in the Noun Dictionary, coding an item for deletion, and un-coding a deleted item.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL REQUISITIONS, PART 1**

Part 1 of two courses, this teaches an overview of the CEMAS requisitioning process for a Bill of Materials, the creation and adding a line item to a Bill of Materials, using the Noun Dictionary for the Bill of Materials, and how to complete additional fields.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL REQUISITIONS, PART 2**

Part 2 of two courses, this teaches an overview of the process of requisitioning items or firming a Bill of Materials. Additional topics include how to review a Bill of Materials, assign a Required Delivery Date, check funds records, process a Firm Stimulation, check the status and information found on the Firm Bill of Materials Transaction Report, the Bill of Material

Inquiry Print, and the Abstract.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): AWARD PURCHASE ORDER**

This course teaches an understanding of “what” the Base Contracting manual award process is, how to access purchasing order records, modify records, print a Purchase Order Award Notice, and review the FCA balances related to a purchase order.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): RECEIVE ITEM**

This course covers the overall process for receiving items into the CEMAS inventory, accessing the Bill of Materials for an item, modifying a record, receiving an item, and printing a Property Movement Document.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): ASSIGN HOLDING AREA**

This course provides an overview of assigning a location in the CEMAS Holding Area when items are received, inquiring about items in that holding area, locating an item, updating a holding area location, and reading, assigning and understanding a BIN number.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL COMPLETE NOTIFICATION**

This course teaches an optional method of notification when a Bill of Materials is complete and ready for issue from the Holding Area. Topics covered include CEMAS End of Session, CEMAS End of Day, Daily Material Completed Bill of Materials List, modification of tracking and status fields in the Active CE Work Order/Request screen, tracking indicators, and updating the status codes of materials.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): GPC PURCHASE, PART 1**

Part 1 of two courses, this teaches the process for using the International Merchant’s Purchase Authorization Card (IMPAC) or Government Purchase Card (GPC), as well as how to obtain an IMPAC, ordering an IMPAC item, and how IMPAC items affect the Bill of Materials.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): GPC PURCHASE, PART 2**

Part 2 of two courses, this teaches an overview of awarding and receiving International Merchant’s Purchase Authorization Card (IMPAC) items using a procedure that is unique to CEMAS IMPAC processing. Additional topics include accessing purchase order records for IMPAC, updating multiple purchase orders on the Quick Update of Credit Card Purchases screen,

adding a vendor to the Vendor Selection screen, and updating the Receiving screen.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): STORE MAINTENANCE MAIN STORE**

This training provides an overview of the CEMAS Store concept, plus adding or deleting individual items for the Main Store, calculating initial stock levels, overriding CEMAS calculated levels, and modifying records for store reorders.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): STORE MAINTENANCE FORWARD STORE**

This course teaches an overview of establishing and operating a Forward Store and how it can be used for adding, deleting and inquiring about items in the stores.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): STORE MAINTENANCE STORE REORDER**

Designed to provide an overview of restocking the Main Store and the Forward Stores, this course covers the three methods for ordering store stock: Automatic Main Store Reordering, On-line Store Reordering, and Line Item Requisition.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL ISSUE**

This course provides an overview of issuing materials to the CEMAS customers out of the Holding Area and the Main Store, searching the Noun Dictionary for Material Issue and adding multiple items to an issue.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): NON-CEMAS GPC PURCHASE**

This training offers an overview of purchasing items using Non-CEMAS Material procedures and an International Merchant's Purchase Authorization Card (IMPAC) or Government Purchase Card (GPC) without first requisitioning the items through CEMAS. Other topics include when to use Non-CEMAS Material procedures and IMPAC for purchasing an item, what steps are included in this type of transaction, and how the transaction affects a funding document and Bill of Materials.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL RETURNS**

This course covers the process for returning materials, specifically to the Holding Area, the Forward Stores, and how these returns affect the Bill of Materials.

*versions: Air Force*

*average completion time: 20 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): ON-HAND MATERIAL TRANSFER**

Designed to provide an overview of how to use “on-hand” assets to satisfy immediate requirements using CEMAS, this course covers transferring, borrowing and returning items from one work order to another.

*versions: Air Force*

*average completion time: 20 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): NON-MATERIAL GPC PURCHASE**

This training offers an overview of using an International Merchant’s Purchase Authorization Card (IMPAC) or Government Purchase Card (GPC) for purchases that are not material related. Other topics include how to obtain services with the IMPAC, committing funds for IMPAC transactions, how to obligate funds for IMPAC transactions, and how IMPAC material and non-material transactions affect funding documents.

*versions: Air Force*

*average completion time: 20 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): BILL OF MATERIAL (BOM) CLOSE-OUT**

This training gives an overview of the process of closing out a BOM when a work requirement has been completed, including a manual and automated close-out process and what to do when a BOM does not successfully close.

*versions: Air Force*

*average completion time: 20 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): GPC RECONCILIATION**

This course educates on the the process of reconciling bank statements after using an International Merchant’s Purchase Authorization Card (IMPAC) or Government Purchase Card (GPC). Other topics include how to review individual line items on a record, what to do if a transaction does not match the bank statement, reconciling a record, and what to do if the purchase does not appear for reconciliation.

*versions: Air Force*

*average completion time: 15 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL DISTRIBUTION**

This course covers the material distribution process; specifically, monthly distribution, options for programmatic distribution, how the distribution process is affected by International Merchant’s Purchase Authorization Card (IMPAC) service charges, options on the Material Distribution Schedule, how it affects the budget process, and the summarized cost center assignments.

*versions: Air Force*

*average completion time: 20 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): DLA—PRIME VENDOR INTERFACE, PART 1**

Part 1 of two courses, this offers an overview of the Prime Vendor Defense Logistics Agency (DLA) contract. Topics include the advantages of the program, initiating the process, adding the Prime Vendor file, editing contract information, and the DLA-Prime Vendor Interface.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): DLA—PRIME VENDOR INTERFACE, PART 2**

Part 2 of two courses, this offers a detailed overview of the Prime Vendor program. Topics include interface transaction codes, using the Buying Problem Selection screen, how to review a quote from a vendor on CEMAS, problem solving, and purchasing decisions from a Prime Vendor.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): SBSS—STANDARD BASE SUPPLY SYSTEM INTERFACE**

This training provides an overview of the basics of SBSS, such as how to retrieve a file for processing, updating a purchase order, how to determine if files are missing or if they have already been processed and what to do with unprocessed SBSS files.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): FUNDS FLOW AND MONITORING**

This course covers how different processes affect the funding documents. Specifically, organizational records and Fund Cite Authority records, terms commonly used in the CEMAS funds process, how various transactions affect funds, Project Fund Management Records, and the CEMAS products that keep up-to-date fund status records.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): INVENTORY ADJUSTMENTS, PART 1**

Part 1 of two courses, this teaches the process of how to make inventory adjustments. Topics include the Past Due Inventory Product, Items to be Inventoried Product, setting inventory options, entering first counts from inventories, scheduling a Special Inventory, and the Store Items Pending Inventory product.

*versions: Air Force*

*average completion time: 20 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): INVENTORY ADJUSTMENTS, PART 2**

Part 2 of two courses, this provides a detailed overview of the inventory adjustment process. Topics include how to update inventory quantities, researching inventory discrepancies, how to do an inventory adjustment, using the Inventory Checklist, and the products involved in the inventory process.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): WORK FLOW**

This is a general course providing an overview of the steps in the CEMAS work flow. Topics include identifying materials, how and by whom a delivery date is assigned, the steps involved in firming a Bill of Material, how materials are purchased,

the steps involved in receiving and storing materials, and issuing materials and closing out the work order.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): TRANSACTION HISTORY FILE**

This training covers all responsibilities of the Transaction History file, such as keeping track of status and activities of all CEMAS Stock List numbers (CSLs). Other topics include accessing data fields on the Transaction History File Inquiry screen and how to trace balances by transaction history.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MONTHLY MANAGEMENT SUMMARY**

This course provides Best Management Practices (BMPs) for CEMAS operations. Details covered include how to select a Management Summary for review, information on data type within the Monthly Management Summary, understanding data on the Summary screens, and how to effectively use the Summary screens to ensure inventory accuracy.

*versions: Air Force*

*average completion time: 10 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL ACQUISITION WORKLOAD, PART 1**

Part 1 of two courses, this training teaches effective use and processes of the Material Acquisition Workload screen, such as options available on the Selection screen, how to review and manipulate a Bill of Materials (BOM), how to assign a clerk to a BOM or review BOMs assigned to a particular clerk, and how to review a BOM that has been in the system.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): MATERIAL ACQUISITION WORKLOAD, PART 2**

Part 2 of two courses, this training offers an overview of line item requisitions in the Workload process. Topics covered include the Pending Material Ordering Review Options screen, how to review quotes from the Buying Problem Selection screen, how to review newly established, un-researched Noun Records, and how to review items added to firmed Bills of Materials (BOMs) that need purchase authorization.

*versions: Air Force*

*average completion time: 15 minutes*

### **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): END OF SESSION (EOS) PROCESSING, PART 1**

Part 1 of two courses, this provides an overview of the Interim Work Information Management System (IWIMS) End of Session (EOS) process. Other topics include how to establish the CEMAS Run Frequency, how to schedule an “as required” report, IWIMS End of Session Menu, inhibiting log-ons, and suspending interface processes.

*versions: Air Force*

*average completion time: 20 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): END OF SESSION (EOS) PROCESSING, PART 2**

Part 2 of two courses, this is a continuation of the CEMAS: EOS Processing, Part 1 training. Additional information is provided on the Interim Work Information Management System (IWIMS) End of Session (EOS) process. Other topics include File Share Server Utilities, shutting down sharers and running the EOS.

*versions: Air Force*

*average completion time: 15 minutes*

## **CIVIL ENGINEERING MATERIAL ACQUISITION SYSTEM (CEMAS): END OF SESSION (EOS) PRODUCTS**

This training covers the CEMAS End of Session (EOS) Products, how to access them, set the retention frequency and how to determine when printing is needed for EOS Products.

*versions: Air Force*

*average completion time: 20 minutes*

## **COMMAND DUTY OFFICER (CDO) ENVIRONMENTAL TRAINING I**

This training is an introduction to the general environmental duties and responsibilities of the CDOs. Topics covered include regulatory requirements, spill response actions, stormwater pollution prevention, hazardous waste, recycling, odors, air emissions, and animals.

*versions: Installation Specific*

*average completion time: 15 minutes*

## **COMMAND DUTY OFFICER (CDO) ENVIRONMENTAL TRAINING II**

This training provides an introduction to the general environmental duties and responsibilities of the CDOs. Topics include regulatory requirements, spill response actions, storm drain sluice gate valves, stormwater outfall locations, stormwater pollution prevention, hazardous waste, recycling, odors, and animals.

*versions: Installation Specific*

*average completion time: 15 minutes*

## **CONFINED SPACES AWARENESS**

Targeted towards personnel who may encounter confined spaces, this training provides an overview of confined spaces requirements. Topics include requirements for identifying, testing, classifying, and placing signage for confined spaces, hazards associated with confined spaces, responsibilities of entrants and attendants, and emergency and rescue procedures.

*versions: Air Force*

*average completion time: 15 minutes*

## **CONSERVATION**

This course provides an overview of the basics; specifically, for personnel who require conservation awareness. Topics covered include energy, water, fuel and natural resource conservation.

*versions: Alabama, Bahrain, DoD, General Overseas, Greece, Idaho, Italy, Japan, Korea, Spain, United Kingdom*

*average completion time: 10 minutes*

## **CONTRACTOR: INSTALLATION SPECIFIC ENVIRONMENTAL REQUIREMENTS**

This is a unique course covering Installation Specific Environmental Requirements for Construction Contractors. This course takes an in-depth look at Contractor training and offers information specific to a facility, installation, or region to ensure Contractor knowledge and understanding.

*versions: this training is unique for every organization*

*average completion time: time varies and is dependent on the organization*

## **CONTRACTOR: MARINE COATING OPERATIONS**

This training is an introduction to local rules, regulations, and record-keeping requirements applying to marine coating operations.

*versions: Installation Specific*

*average completion time: 20 minutes*

## **CORROSION CONTROL**

This course provides a general overview of corrosion control, such as waste disposal, safety, non-destructive testing, cathodic protection, and protective coatings.

*versions: Air Force, Alabama, General Overseas, Greece, Idaho, Japan, Korea*

*average completion time: 15 minutes*

## **DIGGING IN THE GROUND**

Designed for personnel who perform activities which involve digging in the ground, this particular course focuses on requirements, rules and regulations for environmental and safety compliance.

*versions: General Overseas, Greece, Italy, Japan, Korea, United Kingdom, USA*

*average completion time: 5 minutes*

## **DIVERSITY OF AMPHIBIANS AND REPTILES IN THE UNITED STATES**

An overview on diverse amphibians and reptiles that Navy personnel may encounter, and the challenges associated with these animals. This module reviews the following: amphibians and reptile differences, frog diversity, salamander diversity, turtle diversity, lizard diversity, snake diversity, crocodilian diversity, venomous reptiles in the U.S., introduced and invasive species, species at risk, diversity of amphibians and reptiles on U.S. Navy and Marine Corps land, common amphibians and reptiles found at specific bases (Marine Corps Base Camp Lejeune, Air Station Kingsville, Marine Corps Base Camp Pendleton, Naval Radio Station Jim Creek, Rangeley SERE School), example management issues common to military installations, DoD partners in amphibian and reptile conservation, DoD PARC goals, and available information resources.

*versions: Navy (Includes audio)*

*average completion time: 20 minutes*

## **DOT HAZMAT REGULATIONS**

This course provides an overview of DOT regulations regarding hazardous materials. Topics covered include training, security awareness, hazard classes, appropriate marketing, packaging, and record-keeping.

*versions: General*

*average completion time: 20 minutes*

## **DRINKING WATER**

This training covers drinking water rules and regulations, including permits for public water systems, monitoring and reporting contaminants in drinking water, backflow and backflow prevention, disinfection when line breaks occur, lead and copper in drinking water, and system inspections.

*versions: AL, AK, AZ, AR, Army, Bahrain, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, Guam, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **DRINKING WATER: REVISED TOTAL COLIFORM RULE**

This module educates on the Revised Total Coliform Rule (RTCR) as one of the national primary drinking water regulations that protect the safety of drinking water in the United States. Awareness topics include: introduction and purpose of the Revised Total Coliform Rule (RTCR), applicability and compliance timeline, requirements under RTCR, Maximum Contaminate Level (MCL), MCL violations, sample siting plans, monitoring, routine samples, repeat samples, assessments and corrective actions, Treatment Technique (TT) Triggers and corrective actions, recordkeeping and reporting, public notification requirements, and best practices for PWSs.

*versions: Navy (Includes audio)*

*average completion time: 20 minutes*

## **DRINKING WATER: PUBLIC NOTIFICATION RULE AND THE CONSUMER CONFIDENCE REPORT RULE**

This training outlines the requirements of both the Public Notification Rule and the Consumer Confidence Report Rule, providing references and samples to facilitate compliance. Module content includes: introduction to the Public Notification (PN) Rule and its history, elements of a Public Notice, the three tiers of Public Notification, distribution, reporting, and recordkeeping of PNs, introduction to the Consumer Confidence Report (CCR) Rule, annual requirements, reporting and recordkeeping of CCRs, and more.

*versions: Navy*

*average completion time: 20 minutes*

## **EESOH-MIS-HAZARDOUS MATERIALS**

This course provides training and demonstrations on using the EESOH-MIS system. Details include managing HAZMAT inventories, searching for MSDSs and creating and updating Process Authorization records. EESOH-MIS replaces the AF-EMIS HAZMAT tracking system and is accessed via the Air Force Portal. Training is targeted towards anyone who uses the EESOH-MIS system.

*versions: Installation Specific*

*average completion time: 20 minutes*

## **ELECTRICAL**

Designed for personnel who perform activities on electrical systems, this brief awareness training covers environmental rules and regulations for environmental and safety compliance.

*versions: General, USA*

*average completion time: 5 minutes*

## **EMERGENCY GENERATORS: COMBUSTION OPTIMIZATION AND OPERATOR TRAINING: IN-DEPTH 10 PART TRAINING (MARYLAND )**

In this 10 part series, generator operators learn about basic maintenance, equipment operations, control functions, regulatory agency compliance, requirements for routine checks, and other power system topics related to emergency generators. Module topics include: Safety, Engine Characteristics, Air Quality Background Information, Engine Control Systems, Troubleshooting, Offroad Engine Emissions, Applicable Federal Regulations, Emergency Generator Maintenance, Operating Emergency Generators, and Recordkeeping Requirements.

*versions: Maryland*

*average completion time: 15 minutes per module*

## **EMERGENCY GENERATORS: COMBUSTION OPTIMIZATION AND OPERATOR TRAINING: IN-DEPTH 10 PART TRAINING (NSA WASHINGTON)**

This is a 10 part series designed for anyone involved with power generation equipment in their plant or facility. Training informs generator operators about basic maintenance, equipment operations, control functions, regulatory agency compliance, requirements for routine checks and other power system topics.

*versions: NSA Washington*

*average completion time: 15 minutes per module*

## **EMERGENCY PLANNING AND COMMUNITY RIGHT-TO-KNOW ACT (EPCRA)**

This course serves as an introduction to EPCRA. Targeting personnel working in areas that have TRI reporting or EPCRA compliance tracking responsibilities, this training covers provisions of EPCRA, state and local committees, emergency planning, hazardous chemical reporting requirements, toxic chemical release inventory, and non-compliance penalties.

*versions: USA*

*average completion time: 10 minutes*

## **ENVIRONMENTAL AWARENESS AND ENVIRONMENTAL MANAGEMENT SYSTEM TRAINING: NAVY REGION SOUTHWEST**

This module defines Environmental Awareness and the Environmental Management System and explains the importance of both. Additional topics include how an EMS works, housekeeping, lists of regulated materials, Leadership's role in the EMS, and each individual's role.

*versions: General*

*average completion time: 20 minutes*

## **ENVIRONMENTAL COMPLIANCE AND ENFORCEMENT**

This course teaches an overview of environmental compliance and enforcement through basic environmental legislation. Other topics include audits and inspections, the inspection process, government agency enforcement actions, penalties for non-compliance, and where to seek compliance help.

*versions: Air Force, AL, AK, CO, General Overseas, Greece, ID, Italy, Japan, Navy, Korea, Marines, NC, OK, Poland, Spain, United Kingdom*

*average completion time: 15 minutes*

## **ENVIRONMENTAL (EV) CHECKLIST TRAINING: NSA PHILADELPHIA AND PHILADELPHIA NAVY YARD ANNEX - NEW!**

This training covers the Environmental Checklist (EC), Primary Environmental Risks to Project Execution, requirements for Cultural Resources, requirements for adding generators and other emissions sources, requirements for stormwater, soil management, and responsibilities and penalties.

*versions: NSA Philadelphia and Philadelphia Navy Yard Annex*

*average completion time: 20 minutes*

## **ENVIRONMENTAL JUSTICE (EJ)**

This course serves as an introduction to Environmental Justice (EJ) and takes a look at the origins of the Environmental Justice movement, Federal actions to address EJ and policies that have already been put into action.

*versions: General*

*average completion time: 15 minutes*

## **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS)**

This training covers a general overview of Environmental Management Systems (EMS), plus the EMS cycle, keys to a successful EMS, major concepts of an EMS, important facts about EMS, and who needs to know about an EMS.

*versions: Air Force, CT, General, Greece, HI, ID, IL, Italy, Japan, Navy, NSA Mid-South, Poland*

*average completion time: 20 minutes*

## **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER**

This Air Force training is an in-depth, 2 hour series consisting of 10 training courses that cover an EMS overview and the responsibilities as a member of the Cross Functional Team (CFT). Additional topics include Environmental Policy, EMS scope, the Cross Functional Team, identifying aspects, scoring environmental impacts, environmental objectives and targets, Environmental Management Plans, monitoring and measurement, EMS assessment, records management, management review, and maintaining your EMS.

*versions: Air Force*

*average completion time: 2 hours*

## **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: INTRODUCTION**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This introduction serves as an overview of what the Environmental Management System (EMS) Practitioner training series covers and for whom the training is intended.

*versions: Air Force*

*average completion time: 10 minutes*

## **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: ENVIRONMENTAL POLICY, EMS SCOPE AND THE CROSS FUNCTIONAL TEAM**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This course provides an overview on background information for the rest of the courses in the series, as well as Environmental Policies, EMS Implementation plans, who makes up a CFT, and the CFT responsibilities.

*versions: Air Force*

*average completion time: 10 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: IDENTIFYING ASPECTS**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This course covers the process for creating an environmental aspects inventory, the development of this list and why it is important to an installation's EMS and the role as a CFT member to ensure the EMS is implemented.

*versions: Air Force*

*average completion time: 15 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: SCORING ENVIRONMENTAL IMPACTS**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This training goes over the process of determining impacts to the environmental, scoring the impact and scoring criteria, how to assess the relative cost, and labeling significant aspects.

*versions: Air Force*

*average completion time: 10 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: ENVIRONMENTAL OBJECTIVES AND TARGETS**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This course educates on the process of setting environmental objectives and targets for an installation's specific needs. Other topics include issues to consider when developing these objectives and targets, using performance indicators, and how objectives and targets are formalized for installations.

*versions: Air Force*

*average completion time: 10 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: ENVIRONMENTAL MANAGEMENT PLANS**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This course educates on the process for developing Environmental Management Plans (EMPs), what an EMP is, why EMPs are needed, and what documentation is needed.

*versions: Air Force*

*average completion time: 10 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: MONITORING AND MEASUREMENT**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This course provides an overview of the process of monitoring and measuring how successful the Environmental Management System (EMS) program is within an installation, including tracking performance measures, conducting compliance assessments, tracking operational controls, and tracking equipment calibration.

*versions: Air Force*

*average completion time: 10 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: EMS ASSESSMENT**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This course educates on the process of conducting a good Environmental Management System (EMS) assessment. Training includes how to prepare for an EMS assessment, how to conduct an EMS assessment, how to document and follow up on an EMS assess-

ment, and how to implement the corrective action process.

*versions: Air Force*

*average completion time: 20 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: RECORDS MANAGEMENT**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This training covers proper documentation of an installation's EMS program, including the difference between a document and an official record, and the responsibilities as a Cross Functional Team (CFT) member in keeping appropriate EMS records.

*versions: Air Force*

*average completion time: 10 minutes*

### **ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) PRACTITIONER: MANAGEMENT REVIEW AND MAINTAINING YOUR EMS**

This training targets Air Force CFT members and the personnel who develop the installation's EMS program. This course is an overview of the management review process and steps towards keeping the EMS updated. Additional topics include Environmental Policy, EMS scope, the Cross Functional Team, identifying aspects, scoring environmental impacts, environmental objectives and targets, Environmental Management Plans, monitoring and measurement, EMS assessment, records management, management review, and maintaining your EMS.

*versions: Air Force*

*average completion time: 10 minutes*

### **ENVIRONMENTAL LAWS AND LIABILITY**

This training provides an overview of the federal laws developed to protect the environment and human health from hazardous chemicals and materials with education on the National Environmental Policy Act, Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act, CERCLA, Pollution Prevention Act, and worker safety.

*versions: General*

*average completion time: 20 minutes*

### **ENVIRONMENTAL SUSTAINABILITY TRAINING: AWARENESS**

This training provides an understanding of what sustainability means to an organization and discusses issues and ways to integrate sustainability into an organization's planning and budgeting of operations. A historical perspective is provided, pollution prevention initiatives are reviewed, the triple bottom line concept is introduced, and the importance of communication to educate and involve everyone in making the shift toward an organization-wide sustainability program is emphasized. Case studies provide examples and lessons learned by government and business.

*versions: General*

*average completion time: 40 minutes*

### **ENVIRONMENTAL SUSTAINABILITY TRAINING: FOUNDATION FOR ESTABLISHING A SUSTAINABLE ORGANIZATION**

This training provides an overview of several sustainability efforts underway in communities, organizations and industry. Topics include Life Cycle Assessments, Environmental Impact Assessments and Green Chemistry. The Sustainability Wheel is introduced as a model to determine an organization's status in meeting sustainability efforts and challenges. Videos are incorporated to enhance the training.

*versions: General*

*average completion time: 60 minutes*

### **ENVIRONMENTAL SUSTAINABILITY TRAINING: SUSTAINABILITY IMPLEMENTATION**

This training explores the processes that businesses can use to implement sustainability. Topics include the six research themes of sustainability identified by the EPA. Videos are incorporated for enhanced training.

*versions: General*

*average completion time: 40 minutes*

### **ENVIRONMENTAL SUSTAINABILITY TRAINING: SUSTAINABILITY LEADERS**

This training provides basic information on the state of the sustainability movement and reviews recent executive orders and ISO 14000 Standards. It explores the failure of traditional organizations to communicate across “information silos” and introduces ways that multi-functional aspects of an organization can work together for positive interaction and improvement. This training also covers leadership skills needed for effective sustainable leadership and it addresses the attributes and roles of sustainability leaders.

*versions: General*

*average completion time: 30 minutes*

### **ESOH CAMP FOR UNIT ENVIRONMENTAL COORDINATORS**

The Environmental, Safety, Occupational, and Health Compliance Assessment Management Program (ESOH CAMP) course is targeted towards the Unit Environmental Coordinators (UECs) responsible for providing direction in preparing for environmental management assessments. This course outlines the reasons for conducting assessments, their frequency, responsibilities of the UEC in preparing for an assessment, and the importance of assessments in preparing for regulatory inspections and in preventing fines.

*versions: Air Force, United Kingdom*

*average completion time: 10 minutes*

### **ESSENTIAL FISH HABITAT POLICY REVISION AND APPLICATION**

This module provides an overview of fish habitat policies put in place to help identify, rebuild, and protect exploited fish habitats. Specifically, this module covers applicable acts, policies, mandates and how they apply to the Navy, acronyms, definitions, types of habitats, levels of impact, EFH (Essential Fish Habitat) assessment, action effects, options for EFH consultations, and federal agency response.

*versions: Navy*

*average completion time: 40 minutes*

### **ETHICS FOR ENVIRONMENTAL PROFESSIONALS**

Targeting DoD employees, this course provides an overview of the Government rules in which to comply. Topics include guidelines on avoiding conflicts of interest and property handling issues such as gifts, travel, personal and official relations, financial disclosure reports, use of Government resources and time, information disclosure, and post-Government employment restrictions.

*versions: DoD, Air Force*

*average completion time: 20 minutes*

## **FACILITY MANAGER**

Targeting newly appointed and current facility managers, this course provides an overview on the purpose of Civil Engineering (CE), the duties and responsibilities of a facility manager and the tasks necessary to work efficiently and increase overall customer satisfaction. Additional topics include general Civil Engineering, appointment of facility managers, facility manager responsibilities, fire protection, service contracts, energy conservation, service call procedures, flow of work request, self help work, facility abuse, key control, records, space management, natural disasters, facility security, and grounds maintenance.

*versions: Air Force, Japan, Korea, PACAF*

*average completion time: 25 minutes*

## **FALL PROTECTION**

Designed specifically for the Air Force, this training covers required fall protection in general industry and construction, such as fall hazards, fall protection systems or devices and their uses, inspection, maintenance, and storage requirements.

*versions: Air Force*

*average completion time: 20 minutes*

## **FILTERING FACE PIECE DEVICES**

This course covers the limitations of “dust masks” or Filtering Face Piece Devices (FFPD). Targeting those who use dust masks, this training covers the importance of device limitation training when choosing to wear them.

*versions: Installation Specific*

*average completion time: 15 minutes*

## **FIRE ALARM SYSTEM REPAIR**

This training is designed to target personnel who perform fire alarm system repair activities and offers a brief awareness of the compliance requirements related to environmental rules and regulations. Additionally, education on fire alarm system repair activities which can cause human or environmental harm.

*versions: Bahrain, DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **FIRE PROTECTION FOR UNIT ENVIRONMENTAL COORDINATORS**

This course provides an overview of the UECs role in fire protection. Additional topics include dust explosion hazards and hazardous materials.

*versions: Air Force*

*average completion time: 10 minutes*

## **FORMALDEHYDE AWARENESS**

This course targets all those potentially exposed to formaldehyde in the work area and helps fulfill the requirements of 29 CFR 1910.1048, OSHA’s Formaldehyde Standard. Details of the course include the definitions and descriptions of formaldehyde, common uses, routes of exposure, health hazards, signs and symptoms of exposure, preventative measures for exposure, supervisor responsibilities, and employee responsibilities.

*versions: Installation Specific*

*average completion time: 10 minutes*

## FUELS OPERATOR

Targeting tank truck drivers and personnel involved with delivering fuel, this training offers a brief awareness of loading and unloading oil products. Topics covered include proper protocols to help prevent spills and leaks to the environment.

*versions: Bahrain, DoD, General Overseas, Greece, Japan, Korea*

*average completion time: 5 minutes*

## GENERAL ENVIRONMENTAL COMPLIANCE INFORMATION - **NEW & IMPROVED!**

This *interactive* course provides an introduction to environmental compliance, discussing what environmental compliance means and why it is important. Additional topics include common regulated materials and wastes, compliance pointers and where to get compliance help. The training format includes interactive elements, knowledge checks, and audio.

*versions: General, Poland*

*average completion time: 20 minutes*

## GENERAL INVENTORY AND MONITORING TECHNIQUES FOR HERPETOFAUNA

Developed for the Department of the Navy, this training describes four of the common inventory and monitoring techniques used for amphibians and reptiles and the positive aspects and limitations of each technique. It explains the need for clear study objectives and an understanding of the species and life stages being targeted when selecting the most suitable survey techniques.

*versions: General (Includes audio)*

*average completion time: 20 minutes*

## GENERAL LABOR

This is a brief awareness training of the compliance requirements relating to environmental rules and regulations, and is geared towards a general teaching of guidelines to use when working on the jobsite.

*versions: Bahrain, DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## HAZARD COMMUNICATION (HAZCOM)

Targeting personnel involved with the management of hazardous materials, this course educates on the hazard communication standard, the written program, physical hazards, understanding health information, physical and health hazard control methods, material safety data sheets, and label requirements.

*versions: Air Force, DoD, General Overseas, Greece, Japan, Korea (Includes audio)*

*average completion time: 15 minutes*

## HAZARDOUS MATERIALS

This course offers an introduction to hazardous materials for personnel involved with the management of hazardous materials. Topics include the difference between hazardous materials, substances and wastes, what makes a material hazardous, who governs hazardous materials, and the warning signs of harmful situations.

*versions: AL, AZ, Navy, NC, Poland, USA*

*average completion time: 20 minutes*

## HAZARDOUS MATERIALS MANAGEMENT FOR UNIT ENVIRONMENTAL COORDINATORS

This course educates on hazardous materials management, such as hazardous properties of materials, the importance of using

HAZMAT properly, record-keeping, and disposal requirements.

*versions: Air Force*

*average completion time: 15 minutes*

### **HAZARDOUS MATERIAL SPILLS FOR UNIT ENVIRONMENTAL COORDINATORS**

This training offers information on hazardous material spills; specifically, the actions to be taken when spills or accidental discharge of hazardous materials occur, how to contain or report a spill, removing a spill, and storage tank POL releases.

*versions: Air Force*

*average completion time: 15 minutes*

### **HAZARDOUS MATERIALS STORAGE PRACTICES**

This training provides an overview of the proper management, use and storage of hazardous materials (HAZMAT). Other topics include requirements for HAZMAT storage, flammable storage cabinet management and compressed gas management, reducing the types and volume of hazardous materials, reducing the amount of expired hazardous materials, and ensuring proper hazardous waste management.

*versions: Air Force*

*average completion time: 10 minutes*

### **HAZARDOUS PROPERTIES**

Designed for personnel who generate, package, handle, store, transport, or manage hazardous materials or waste, this training provides an overview of the terms required to understand and identify the physical and chemical properties of a hazardous substance. These are hazardous property terms related to vapor, temperature, and fire, the pH scale, MSDS, and Hazardous Materials Information Resource System.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, Guam, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, TX, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

### **HAZARDOUS WASTE COMPATIBILITY**

Designed for personnel who generate, package, handle, store, transport, or manage hazardous materials or waste, this course covers the basics of storage compatibility, including how to safely store hazardous materials, DoD hazardous chemical compatibility system and Federal regulations.

*versions: General*

*average completion time: 20 minutes*

### **HAZARDOUS WASTE GENERATOR TRAINING: NSA PHILADELPHIA AND PHILADELPHIA NAVY YARD ANNEX - NEW!**

This training module covers Hazardous Waste personnel roles and responsibilities, handling and storage of waste, proper waste disposal procedures, prohibitions and liabilities, spill response and emergency procedures.

*versions: NSA Philadelphia and Philadelphia Navy Yard Annex*

*average completion time: 20 minutes*

### **HAZARDOUS WASTE IDENTIFICATION**

Designed for personnel who generate, package, handle, store, transport, or manage hazardous materials or waste, this training

educates on how to identify hazardous waste. Topics include the definitions of solid waste and hazardous waste, exclusions, listed wastes, contaminated debris and media, and land disposal restriction program.

*versions: General*

*average completion time: 20 minutes*

## **HAZARDOUS WASTE MANAGEMENT**

Designed for personnel who generate, package, handle, store, transport, or manage hazardous materials or waste, this training offers an overview of managing hazardous waste. Other topics include general requirements, the Resource Conservation and Recovery Act (RCRA), state laws, classifications, generator status, reporting requirements, making a hazardous waste determination, and hazardous waste containers.

*versions: Air Force, AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, General Overseas, Guam, HI, ID, IL, IN, IA, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

## **HAZARDOUS WASTE MANAGEMENT FOR UNIT ENVIRONMENTAL COORDINATORS**

Designed to target Unit Environmental Coordinators, this course offers an overview of the hazardous waste management duties. Additional topics include identifying regulated wastes, hazardous waste disposal procedures, and wastes requiring special management.

*versions: Air Force*

*average completion time: 10 minutes*

## **HAZMAT SHELF-LIFE MANAGEMENT PROGRAM FOR UNIT ENVIRONMENTAL COORDINATORS**

This course offers guidelines for a shelf-life management program, such as shelf-life materials, self-life codes and markings, time periods and cure date.

*versions: Air Force*

*average completion time: 10 minutes*

## **HAZWOPER: FIRST RESPONDER AWARENESS VIDEO TRAINING**

Targeting personnel who work in areas where hazardous materials are used and stored, this course provides an overview of duties of the first responder in a hazardous materials accident. This training also features a video addressing the important information a first responder needs to know before calling the emergency dispatcher.

*versions: General*

*average completion time: 20 minutes*

## **HEAVY METAL AWARENESS TRAINING: NAS WHIDBEY ISLAND**

An overview on awareness training for service members who may be potentially exposed to heavy metals (HM) at Naval Air Station Whidbey Island. This module reviews the following: what are heavy metals?, heavy metal characteristics, sources, and common exposure locations of heavy metals (Cadmium, Hexavalent Chromium CR (VI), Lead, and Beryllium), how heavy metals enter the body, health consequences due to exposure, heavy metal safety standards and control, Fleet Readiness Center Northwest (FRCNW) heavy metal policy, break room requirements, and drinking fountain requirements.

*versions: NAS Whidbey Island*

*average completion time: 20 minutes*

## **HERBICIDE APPLICATOR**

This training targets personnel who manage herbicides as part of their job. Topics covered include instruction in proper handling and application, product labels, appropriate uses, safety precautions, spills, alternative methods for weed control, and standard procedures for returning unused portions.

*versions: Navy*

*average completion time: 20 minutes*

## **HISTORIC PROPERTIES FOR FACILITY MANAGERS**

This training targets Facility Managers and educates on federal laws governing historic facilities; specifically, their requirements to ensure that natural or cultural resources are identified and preserved. Additional topics include an introduction to the National Historic Preservation Act (NHPA) and the National Environmental Policy Act (NEPA), and proper procedures for identifying and preserving natural or cultural resources.

*versions: General*

*average completion time: 10 minutes*

## **HUNTING AND FISHING: REGULATIONS AND RESTRICTIONS**

This course provides an overview of the regulations and restrictions which must be followed to hunt and fish on a particular base. Additional information includes licensing, eligibility to hunt and fish, hunting and fishing procedures, and restrictions for firewood, swimming, panning, and vehicle use.

*versions: Installation Specific*

*average completion time: 15 minutes*

## **INSTALLING CARPET OR TILE**

Targeting personnel who perform activities related to installing carpet or tile, this course offers a brief awareness of the compliance requirements relating to environmental rules and regulations, including activities which can cause human and environmental harm.

*versions: Bahrain, DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **INTEGRATION OF THE GLOBALLY HARMONIZED SYSTEM (GHS)**

This training discusses the integration of the Globally Harmonized System (GHS) into the Navy Hazard Communication Program. Material includes background information on the Hazard Communication Standard (HCS) and the GHS. It also covers the categories of GHS hazards, Safety Data Sheets (SDS), and labeling.

*versions: General (Includes audio)*

*average completion time: 20 minutes*

## **INTRODUCTION TO AMPHIBIANS AND REPTILES**

An overview of the major groups of amphibians and reptiles. This module reviews the following: shared characteristics of amphibians and reptiles, amphibian groups, reptile groups, the differences between amphibians and reptiles, how amphibians and reptiles mate, why amphibians and reptiles are important (biodiversity, ecosystem health, bioindicators, medicine, cultural significance, recreation and education), and a review of the many common myths and misconceptions surrounding amphibians and reptiles.

*versions: Navy (Includes audio)*  
*average completion time: 20 minutes*

## **INTRODUCTION TO CLIMATE CHANGE - NEW!**

This is an introductory course on the topic of climate change. In this module you'll learn basic topics such as what climate change is, the greenhouse effect and global warming, greenhouse gases, the carbon cycle, impacts of climate change, climate science special report, and climate change mitigation and adaption.

*versions: Navy*  
*average completion time: 15 minutes*

## **INTRODUCTION TO DRINKING WATER: 9 PART SERIES**

This 9 part series is an overview of issues and components pertaining to drinking water systems. Examples of topics covered include the Safe Drinking Water Act, application of drinking water standards, the role of the states in Regulating Drinking Water, public water systems classifications, NPDWRs, secondary drinking water regulations, exemptions, testing, and Navy policy, contaminants and water protection, state requirements for water quality, treatment methods, distribution, Emergency Response Plan and necessary actions, and best management practices.

*versions: General (Includes videos)*  
*average completion time: 20 minutes for each module*

## **INTRODUCTION TO DRINKING WATER SYSTEMS: 6 PART SERIES**

This 6 part training series offers awareness training on drinking water systems and backflow. Topics covered include what drinking water systems are, how to avoid contamination and contamination dangers, the Clean Water Act, roles and responsibilities of a certified drinking water operator, waterways and their history, the Safe Drinking Water Act (SDWA) and the regulations and procedures currently enforced to ensure safe drinking water, roles of the state in implementing the provisions of the SDWA, cross connection and the importance of a cross connection control, backflow, examples and types of backflow, drinking water distribution networks, flow, water pressure, and the two types of hazards backflow can cause, dangers of backflow, and backflow prevention devices.

*versions: General*  
*average completion time: 20 minutes for each module*

## **LANDFILL OPERATIONS**

This course provides an overview for operating a landfill. Specific topics include wastes, cover, monitoring, required and recommended facility equipment, record-keeping, bird control, vectors and explosive gases.

*versions: Air Force*  
*average completion time: 15 minutes*

## **LEAD AND COPPER RULE**

This training is an overview of the Lead and Copper rule. Topics covered include health effects, LCR history, monitoring, public notice, and excess requirements. Video and knowledge checks included.

*versions: General*  
*average completion time: 30 minutes*

## **LEAD AWARENESS**

Designed for those who are potentially exposed to lead in the work field, this training helps fulfill the requirements of 29 CFR 1910.1025, OSHA's Lead Standard. Topics covered include the definitions and descriptions of lead, common uses, routes of exposure, health hazards, signs and symptoms of exposure, preventative measures for exposure, and supervisor and employee responsibilities.

*versions: Installation Specific*

*average completion time: 10 minutes*

## **LEAD-BASED PAINT**

This training covers topics such as problems with Lead-Based Paint (LBP), routes of exposure, health effects in children and adults, ways to reduce potential health effects, lead regulations, Toxic Substances Control Act, Resource Conservation and Recovery Act (RCRA), and Lead-based Paint and OSHA.

*versions: Air Force, Bahrain, DoD, General Overseas, Greece, Italy, Japan, Korea, Spain*

*average completion time: 15 minutes*

## **LEAST TERNS FOR CONTRACTORS**

This training targets personnel who perform activities relating to rooftops or rooftop repairs, HVAC servicing or preventative maintenance surveys. This course familiarizes rooftop contractors with the information they need to prevent disturbing nesting colonies of the Least Tern, an endangered shorebird that has taken to nesting on the flat rooftops at Kennedy Space Center.

*versions: Air Force, FL*

*average completion time: 10 minutes*

## **LOCKOUT/TAGOUT (LOTO): AWARENESS**

This is an awareness course targeting personnel who should be familiar with LOTO and are not trained or authorized to apply locks or tags to equipment. Topics covered included the purpose of LOTO procedures, how to recognize a typical lock and tag used for LOTO and procedures to take when a lock and tag is encountered on equipment.

*versions: Air Force*

*average completion time: 10 minutes*

## **LOCKOUT/TAGOUT (LOTO): AIR FORCE**

Designed specifically for the Air Force, this LOTO training includes the awareness education of the main LOTO course. In addition, this course covers the purpose of Lockout/Tagout procedures, LOTO equipment, sources of energy requiring Lockout, the sequence of a Lockout, restoring equipment to service, and LOTO usage logs and inspections.

*versions: Air Force*

*average completion time: 10 minutes*

## **LOCKSMITHING**

This is a brief awareness course on the compliance requirements for environmental rules and regulations. Targeting personnel who perform locksmithing activities, this covers locksmithing activities which can cause either human or environmental harm.

*versions: Bahrain, DoD, General Overseas, Greece, Japan, Korea, United Kingdom, USA*

*average completion time: 5 minutes*

## **MACHINING**

This is a brief awareness on the compliance requirements for environmental rules and regulations. Targeting personnel who perform machining activities, this covers machining activities which can cause either human or environmental harm.

*versions: United Kingdom, USA*

*average completion time: 5 minutes*

## **MEDICAL WASTE MANAGEMENT**

This training provides an overview of handling medical waste and is intended for personnel with job activities involving the generation or exposure to medical waste. Topics covered include types of infectious wastes, other types of non-infectious wastes, medical waste management regulations, proper practices for handling, transporting and disposing of medical waste, treatment methods for medical waste, and what to do in the event of a medical waste spill.

*versions: AK, AL, AZ, AR, Bahrain, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MT, MO, Navy, NE, NV, NH, NJ, NM, NC, ND, OH, OK, OR, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **METHYLENE CHLORIDE AWARENESS**

This training helps fulfill the requirements of 29 CFR 1910.1052, OSHA's Methylene Chloride Standard. Details include the definitions and descriptions of Methylene Chloride, common uses, routes of exposure, health hazards, signs and symptoms of exposure, preventative measures for exposure, supervisor responsibilities, and employee responsibilities. This course is targeted towards all employees who are potentially exposed to Methylene Chloride in the work area.

*versions: Installation Specific*

*average completion time: 10 minutes*

## **MS4: STORMWATER BASIC INFORMATION**

This is an introductory course on stormwater and MS4s covering topics such as what stormwater is, why stormwater is a problem, and what can be done about reducing pollutants in stormwater.

*versions: New London (Includes video)*

*average completion time: 30 minutes*

## **MUNICIPAL MAINTENANCE ACTIVITIES: MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) MAINTENANCE BMPS**

An overview of best management practices (BMPs) to use while maintaining an MS4. This module reviews inspection of the MS4 and its components, inspection for debris, illicit discharges and illegal connections, cleaning of drainage structures, and reporting MS4 issues that require attention. Includes a video and knowledge check.

*versions: General*

*average completion time: 20 minutes*

## **NAS LEMOORE STORMWATER TRAINING: AIRCRAFT OPERATIONS AND MAINTENANCE AND GROUND SUPPORT EQUIPMENT - NEW!**

This training will help you understand the goals of the NAS Lemoore stormwater program for Aircraft Operations and Maintenance and Ground Support Equipment. It includes information on where to obtain an updated copy of the Stormwater Pollution Prevention Plan (SWPPP), what actions need to be taken to protect stormwater quality, and who to contact for all stormwater issues.

*versions: Naval Air Station Lemoore*  
*average completion time: 30 minutes*

### **NAS LEMOORE STORMWATER TRAINING: FUEL FARM AND FUEL SKIDS - NEW!**

This training will help you understand the goals of the NAS Lemoore stormwater program for Fuel Farm and Fuel Skids. It includes information on where to obtain an updated copy of the Stormwater Pollution Prevention Plan (SWPPP), what actions need to be taken to protect stormwater quality, and who to contact for all stormwater issues.

*versions: Naval Air Station Lemoore*  
*average completion time: 30 minutes*

### **NAS LEMOORE STORMWATER TRAINING: INDUSTRIAL WASTEWATER TREATMENT PLANT - NEW!**

This training will help you understand the goals of the NAS Lemoore stormwater program for Industrial Wastewater Treatment Plants. It includes information on where to obtain an updated copy of the Stormwater Pollution Prevention Plan (SWPPP), what actions need to be taken to protect stormwater quality, and who to contact for all stormwater issues.

*versions: Naval Air Station Lemoore*  
*average completion time: 30 minutes*

### **NAS LEMOORE STORMWATER TRAINING: PUBLIC WORKS AND TRANSPORTATION - NEW!**

This training will help you understand the goals of the NAS Lemoore stormwater program for Public Works and Transportation. It includes information on where to obtain an updated copy of the Stormwater Pollution Prevention Plan (SWPPP), what actions need to be taken to protect stormwater quality, and who to contact for all stormwater issues.

*versions: Naval Air Station Lemoore*  
*average completion time: 30 minutes*

## **NATURAL AND CULTURAL RESOURCES**

Designed for personnel responsible for, or may have an impact on, natural and cultural resources. This overview covers the general description of natural and cultural resources, the Natural Historic Preservation Act, the National Environmental Policy Act (NEPA), NEPA notification and reporting requirements, the Endangered Species Act, threatened and endangered species, and encountering an endangered species on the jobsite.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, Guam, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, TN, TX, USA, UT, VT, VA, WA, WV, WI, WY*  
*average completion time: 10 minutes*

## **NATIONAL ENVIRONMENTAL POLICY ACT (NEPA): Navy**

This training is an introduction to the National Environmental Policy Act (NEPA), outlining the steps of the NEPA process, its policies and goals and identifying elements of NEPA that are applicable to Navy projects.

*versions: Navy*  
*average completion time: 20 minutes*

## **NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) COMPLIANCE FOR UNIT ENVIRONMENTAL COORDINATORS**

This course covers National Environmental Policy Act (NEPA) Compliance training for Unit Environmental Coordinators. Topics include “what” NEPA is, general compliance training, and specific Air Force procedures for UECs.

*versions: Air Force*

*average completion time: 10 minutes*

#### **NATURAL RESOURCE PROGRAM OVERVIEW: NAS SIGONELLA - NEW!**

This training is an overview of the Natural Resource Management Program. It includes general information on local natural resources and protected species, information on the Natural Resource Management Plan (NRMP), Italy overseas natural resource compliance requirements, and general natural resource management actions to be completed by environmental staff.

*versions: NAS Sigonella*

*average completion time: 35 minutes*

#### **NATURAL RESOURCE PROGRAM OVERVIEW: NS ROTA - NEW!**

This training summarizes overseas natural resource compliance requirements, provides an overview of the Natural Resource Management Program (NRMP), familiarizes personnel with the NRMP, provides general information on local natural resources and protected species, and identifies general natural resource management actions to be completed by environmental staff.

*versions: Installation Specific*

*average completion time: 35 minutes*

#### **NATURAL RESOURCE PROGRAM OVERVIEW: NSA BAHRAIN - NEW!**

This training is an overview of the Natural Resource Management Program. It includes general information on local natural resources and protected species, information on the Natural Resource Management Plan (NRMP), overseas natural resource compliance requirements, and general natural resource management actions to be completed by environmental staff.

*versions: Installation Specific (Includes audio)*

*average completion time: 35 minutes*

#### **NATURAL RESOURCE PROGRAM OVERVIEW: NSA SOUDA BAY - NEW!**

This training is an overview of the Natural Resource Management Program. It includes general information on local natural resources and protected species, information on the Natural Resource Management Plan (NRMP), overseas natural resource compliance requirements, and general natural resource management actions to be completed by environmental staff.

*versions: Installation Specific (Includes audio)*

*average completion time: 35 minutes*

#### **NATURAL RESOURCE PROGRAM OVERVIEW: NSF REDZIKOWO - NEW!**

This training summarizes overseas natural resource compliance requirements, provides an overview of the Natural Resource Management Program (NRMP), familiarizes personnel with the NRMP, provides general information on local natural resources and protected species, and identifies general natural resource management actions to be completed by environmental staff.

*versions: Installation Specific*

*average completion time: 35 minutes*

## **NAVAL AIR WEAPONS STATION CHINA LAKE: GENERAL EMS AND ENVIRONMENTAL AWARENESS TRAINING: IN-DEPTH 4 PART TRAINING - **NEW!****

This four-part training series covers the following topics: Environmental Management System (EMS) and Environmental Policy, Environmental Management Division (EMD), General Environmental Awareness, Spill Procedures, Natural Resources and Historical Properties.

*versions: Naval Air Weapons Station China Lake*

*average completion time: 15-20 minutes per module*

## **NAVAL BASE KITSAP ENVIRONMENTAL AWARENESS TRAINING**

This is an installation-specific training course and is designed to provide initial and annual Environmental Awareness training for new employees and contractors. Topics include: Environmental Management System (EMS) Awareness, Employee Emergency Spill Response Awareness, Employee Hazardous Waste Management Basics, and Employee Stormwater Control Management.

*versions: Naval Base Kitsap*

*average completion time: 1 hour 50 minutes*

## **NAVY ENVIRONMENTAL MANAGEMENT SYSTEM (EMS) AWARENESS: FOR INSTALLATION COMMANDING OFFICERS & EXECUTIVE OFFICERS**

This module explains key points of the EMS process for Commanding and Executive officers and includes information on SECNAV Policy 5090.8A, sustainability, DoD Strategic Sustainability Performance Plan (SSPP), sustainable regions and installations, sustainability linkages, OPNAVINST 5090.1D, EMS definition (OPNAV M-5090.1), 17-3 requirements (OPNAV M-5090.1), EMS Plan-Do-Check-Act process, impacts and risk, comparison of NOV's received, host and tenant relationships (OPNAV M-5090.1 1-3.2.f), and the benefits of a successful EMS.

*versions: Navy (Includes audio)*

*average completion time: 20 minutes*

## **NOISE MANAGEMENT**

This course offers a brief introduction to the Florida National Guard's Statewide Operational Noise Management Plan, outlining the objectives and fundamentals of a successful complaint management program. Additional topics include worker protection, noise abatement, and prevention of conflict between FLARNG and the surrounding communities.

*versions: Florida National Guard*

*average completion time: 10 minutes*

## **NSA CRANE HAZARDOUS WASTE GENERATOR TRAINING**

This training targets all personnel involved in the management of Hazardous Waste (HW) at an accumulation or storage site. Module topics include general information on hazardous waste, waste profiling, HW container labeling, Generation Log requirements, waste turn-in procedures, types of waste accumulation areas, container management, emergency response procedures, and examples of violations at NSA Crane.

*versions: Naval Support Activity Crane*

*average completion time: 30 minutes*

## **NSAB EMERGENCY GENERATORS: COMBUSTION OPTIMIZATION AND OPERATOR TRAINING: IN-DEPTH 10 PART TRAINING**

This is a 10 part series that informs generator operators about basic maintenance, equipment operations, control functions,

regulatory agency compliance, requirements for routine checks and other power system topics. Maintenance personnel, facilities engineers, contractors, owners and anyone whose duties require them to interact with a rental or standby power generators. Designed for anyone involved with power generation equipment in their plant or facility.

*versions: NSA Bethesda specific*

*average completion time: 15 minutes per module*

## **NSE ENVIRONMENTAL WORK CENTER COORDINATOR INITIAL TRAINING: MODULES 1-7 (NAVAL STATION EVERETT)**

This training series consists of 7 modules and is a familiarization with environmental topics found at the NSE Environmental Work Center. Training topics include Hazardous Waste, Hazardous Materials, Spills, Stormwater, Environmental Management System (EMS) Awareness, and Recycling. This training satisfies the EWCC Initial Training. One time requirement.

*versions: Naval Station Everett*

*average completion time: 3 hours*

## **NUWCDIVNPT ENVIRONMENTAL AWARENESS TRAINING**

This training covers the Environmental Management System (EMS), Division Newport's Significant Environmental Aspects, the National Environmental Policy Act (NEPA) / Executive Order (EO) 12114, Mission Environmental Planning Program (MEPP), and the Environmental Review Board (ERB).

*versions: NUWCDIVNPT specific*

*average completion time: 20 minutes*

## **OIL/WATER SEPARATORS**

This course provides a basic understanding of Oil/Water Separators (OWS) for personnel who use, manage, monitor, or maintain OWS as part of their job responsibilities. Material includes the types and functions of oil/water separators, operation and maintenance, inspection procedures, and laws and regulations governing their use.

*versions: Air Force, FL*

*average completion time: 10 minutes*

## **OPERATING HEAVY EQUIPMENT**

This is a brief awareness training on operating heavy equipment and how it relates to common environmental issues such as wetlands, endangered species habitats, archaeological areas, and erosion control.

*versions: Bahrain, DoD, General Overseas, Greece, Italy, Japan, Korea, Spain, United Kingdom*

*average completion time: 5 minutes*

## **OVERVIEW OF ENVIRONMENTAL COMPLIANCE**

This course provides a more comprehensive overview of environmental compliance. In addition to the basics learned in "General Environmental Compliance Information," this course also covers environmental legislation, federal, state and local environmental laws, inspections and internal audits, violations and enforcement actions, and penalties for non-compliance.

*versions: AK, Army, FL, GA, HI, LA, MD, MS, Navy, SC, TN, TX, USA*

*average completion time: 20 minutes*

## **OZONE DEPLETING SUBSTANCES (ODS)**

This course serves as an introduction to Ozone Depleting Substances (ODS) and educates on the background of ODS, use of ODS in weapon systems, procurement controls, refrigerant management plans, Halon management plans, and Class II ODS Phase-Out.

*versions: Air Force*

*average completion time: 15 minutes*

## **PAINTING**

This introductory training is designed to help workers comply with the environmental regulations that apply to painting. Topics include emissions, waste and paint chemicals.

*versions: General Overseas, Greece, Italy, Korea, Navy, Spain, United Kingdom, USA*

*average completion time: 5 minutes*

## **PHARMACEUTICAL WASTE MANAGEMENT: NAVAL MEDICAL CENTER PORTSMOUTH - NEW!**

This training is intended for all personnel aboard Naval Medical Center Portsmouth, its branch clinics, and other supported organizations who generate pharmaceutical wastes. It includes information on the definition and categories of pharmaceutical wastes, management requirements, and information on special topics affecting Naval Medical Center Portsmouth operations.

*versions: Installation Specific*

*average completion time: 40 minutes*

## **PHNSY AND IMF CODE 106 OCCUPATIONAL HEALTH, SAFETY AND ENVIRONMENTAL BRIEF**

This training targets all personnel and contractors from outside the command or workers from other shipyards and other government agencies. The briefing conveys general Occupational Health, Safety, and Environmental (OSHE) controls required when operating within PHNSY & IMF.

*versions: Pearl Harbor Naval Shipyard and Immediate Maintenance Facility*

*average completion time: 30 minutes*

## **PLUMBING AND PIPE FITTING**

This is a brief awareness on the compliance requirements for environmental rules and regulations. This course is designed for personnel who perform plumbing and pipe fitting activities and educates on the activities that can potentially cause human or environmental harm.

*versions: Bahrain, DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **POLYCHLORINATED BIPHENYLS (PCBs) MANAGEMENT**

This training educates on overall PCB management including general PCB information, federal regulations, identifying PCBs, proper management of PCB items, transformer management, spill response to PCB discharges, and proper disposal of PCBs.

*versions: AL, DoD, FL, General Overseas, Greece, Italy, Japan, Korea, Navy, Spain, TN, TX, United Kingdom, USA*

*average completion time: 25 minutes*

## **PERSONAL PROTECTIVE EQUIPMENT (PPE)**

This course is designed to provide an overview on the different types of PPE and the reasons to use them. Additional topics include hazard determinations, safety equipment, head, body and respiratory protection, and first aid.

*versions: General*

*average completion time: 20 minutes*

## **PESTICIDES**

This is an introduction to pesticides course, educating on pesticide laws, pesticide mixing, storage and disposal, and preparing for pesticide management inspection.

*versions: AL, AK, AZ, AR, Bahrain, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, Guam, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 10 minutes*

## **PETROLEUM, OILS AND LUBRICANTS (POL) MANAGEMENT**

Designed to provide a general overview of Petroleum, Oils and Lubricants (POL) management, this course includes general POL information, spill prevention, control and countermeasure plan, management guidelines for used oil and POL, container storage, and used oil requirements.

*versions: AL, AK, AZ, AR, Bahrain, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, Poland, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 10 minutes*

## **POLLUTION CONTROL**

This course educates on the forms of pollution that must be controlled, such as noise pollution, thermal pollution, light pollution, dust pollution, and odor control.

*versions: AL, AK, DoD, General Overseas, Greece, Italy, Japan, Korea, Poland, Spain, USA*

*average completion time: 15 minutes*

## **POLLUTION PREVENTION (P2)**

This is a brief awareness course that touches on pollution prevention, such as source reduction, purchasing wisely, and some typical P2 projects. This training is targeted at personnel and contractors whose products or services could potentially be modified to minimize the use of hazardous materials and the generation of hazardous waste. Methods discussed include using the least toxic raw materials, using less raw materials, upgrading equipment, and product redesign.

*versions: Air Force, AL, CO, DoD, General Overseas, Greece, HI, ID, Italy, Japan, Korea, Navy, Poland, Spain, United Kingdom, USA*

*average completion time: 10 minutes*

## **PPV ENVIRONMENTAL TRAINING SERIES - 16 MODULES**

Navy PPV Environmental Training Series

This training series consists of 16 modules and is a familiarization with environmental topics which might be found at Navy housing. Training is targeted towards anyone who constructs, renovates, maintains, operates or manages Navy housing.

- *Asbestos: An overview of identification and management of asbestos. This module reviews: relevance of asbestos to PPV, common asbestos locations, environmental requirements, federal, state and local regulations, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition*

assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), asbestos condition assessment guide, and sources for additional information.

average completion time: 20 minutes (Includes audio)

- **Arsenic:** An overview of identification and management of arsenic. This module reviews: description and relevance of arsenic to PPV, environmental requirements, federal, state and local regulations, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), arsenic conditions assessment guide, and sources for additional information.  
average completion time: 20 minutes
- **Cultural and Natural Resources:** An overview of management and preservation of cultural and natural resources. This module reviews: description and relevance of cultural and natural resources, environmental requirements, state and local regulations, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), cultural and natural resources conditions assessment guide, and sources for additional information.  
average completion time: 20 minutes (Includes audio)
- **EPCRA and CERCLA:** An overview of hazardous materials management and reporting obligations. This module reviews: description of EPCRA and CERCLA, relevance of EPCRA and CERCLA to PPV, environmental requirements, state and local regulations, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), EPCRA and CERCLA conditions assessment guide, and sources for additional information.  
average completion time: 20 minutes
- **Hazardous Waste:** An overview of proper management of hazardous waste. This module reviews: descriptions of waste (hazardous, solid and municipal solid), definitions (hazardous waste, universal waste and household hazardous waste), relevance of hazardous waste to PPV, environmental requirements, federal, state and local regulations, compliance (hazardous waste, universal waste and best management practices), environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), hazardous waste conditions assessment guide, and sources for additional information.  
average completion time: 20 minutes
- **Lead-Based Paint:** An overview of identification and management of lead-based paint (LBP). This module reviews: relevance of LBP to PPV, definition of LBP, understanding LBP (locating LBP, locating LBP hazards and LBP conditions), remediation, environmental requirements (HUD, EPA, OSHA and state regulations), disclosure, best business practices and/or methods (reducing LBP hazards), LBP conditions assessment guide, and sources for additional information.  
average completion time: 20 minutes
- **Mold:** An overview of proper management of mold. This module reviews: description of mold, relevance of mold to PPV, environmental requirements, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), mold conditions assessment guide, and sources for additional information.  
average completion time: 20 minutes

- *Ozone-Depleting Substances: An overview of proper management of ozone-depleting substances (ODS). This module reviews: description of ODSs, relevance of ODSs, environmental requirements (compliance), best business practices and/or methods, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), ODS conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes
- *PCBs: An overview of identification and management of polychlorinated biphenyls (PCBs). This module reviews: description of PCBs, relevance of PCBs to PPV, environmental requirements (OSHA, EPA, state and local regulations), compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), PCB conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes
- *Pesticides: An overview of proper management of pesticides. This module reviews: description of pesticides, herbicides, and chlordane, relevance of pesticides to PPV, environmental requirements, federal, state and local regulations, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), pesticide conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes
- *POL Operations and Storage: An overview of proper management of petroleum, oils and lubricants (POL) operations and storage. This module reviews: description of POL operations and storage, relevance of POL operations and storage to PPV, environmental requirements (USTs, non-regulated USTs, ASTs and SPCC plans, used oil regulations, local fire code requirements, POL transportation, disposal/recycling, and leaks or spills), best business practices and/or methods (POL handling and storage, POL leaks or spills, storage tank system maintenance, POL transportation and disposal/recycling), environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), POL operations and storage conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes
- *Pollution Prevention Act: An overview of compliance with the pollution prevention act. This module reviews: description of the pollution prevention act, relevance of PPA to PPV, environmental requirements, state and local regulations, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), PPA conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes
- *Radioactive Materials: An overview of identification and management of radioactive materials. This module reviews: description of radioactive materials, relevance of radioactive materials to PPV, environmental requirements (atomic energy act, nuclear regulatory commission, state, navy, and local regulations), compliance (work practices), best business practices and/or methods (smoke detectors), management plan/standard operating procedures (SOPs), SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), radioactive materials conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes
- *Radon: An overview of proper management of radon. This module reviews: description of radon, relevance of radon to PPV, environmental requirements, state and local regulations, compliance, best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), radon conditions assessment guide, and sources for additional*

information.

average completion time: 20 minutes

- *Recyclables: An overview of proper management for correct and effective recycling. This module reviews: description of recyclables, common recyclables, relevance of recyclables, benefits of recycling, environmental requirements, state and local regulations, best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), recyclables conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes
- *Water: An overview of proper management of water resources. This module reviews: description of water resources (drinking water, surface water, storm water and groundwater), relevance of water to PPV, environmental requirements, federal, state and local regulations, compliance (work practices), best business practices and/or methods, management plan/SOPs, SOP components, environmental condition assessment guide, example scenarios (partner corrective actions and PPV PM verification/prevention steps), water conditions assessment guide, and sources for additional information.*  
average completion time: 20 minutes

## **PROJECT MANAGER**

Targeting Project Managers and Supervisors, this course emphasizes the importance of training staff on compliance, how to become well informed about applicable environmental regulations, and that operations are in compliance with environmental laws.

versions: DoD, General Overseas, Greece, Italy, Japan, Korea, Navy, Spain, United Kingdom

average completion time: 5 minutes

## **RADON ASSESSMENT AND MITIGATION PROGRAM TRAINING: 9 PART SERIES**

This training program includes 9 topic-specific modules supplemented with audio, interactive knowledge checks, graphs, diagrams, images, and a final comprehension quiz. Individual module topics include: Radon and its Health Risks, Navy Radon Policy, NAVRAMP Testing Phases, General Overview of Radon Testing, NAVRAMP Radon Testing, Health Risk Communication, Radon Mitigation Overview, NAVRAMP Mitigation, and Radon Management Plan.

versions: General

average completion time: 20 minutes per module

## **RCRA ANNUAL REFRESHER: INTRODUCTION**

This introductory course targets generators of hazardous waste. The first of the annual refresher courses identifies federal and state requirements met by the RCRA Annual Refresher training, states the purpose of the training, and serves as an introduction to the 7 seven courses of the full 8-hour training series.

versions: Air Force, Greece, Japan, Korea, USA

average completion time: 5 minutes

## **RCRA ANNUAL REFRESHER: DOT HAZMAT REGULATIONS**

This training section educates on the Department of Transportation (DOT) regulations regarding hazardous materials. Designed for generators of hazardous waste, this covers training, security awareness, hazardous class, appropriate marketing, packaging, and record-keeping.

*versions: USA*

*average completion time: 20 minutes*

### **RCRA ANNUAL REFRESHER: ENVIRONMENTAL LAWS AND LIABILITY**

This training section provides information on the federal laws developed to protect the environment and human health from hazardous chemicals and materials. Topics covered include the National Environmental Policy Act (NEPA), Clean Air Act (CAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Pollution Prevention Act (PPA), and worker safety.

*versions: USA*

*average completion time: 20 minutes*

### **RCRA ANNUAL REFRESHER: HAZARDOUS PROPERTIES**

This training section provides information on the terms needed to understand and identify the physical and chemical properties of a hazardous substance, including hazardous property terms related to vapor, temperature, fire, the pH scale, material safety data sheets (MSDSs), and Hazardous Materials Information Resource System (HMIRS).

*versions: USA*

*average completion time: 20 minutes*

### **RCRA ANNUAL REFRESHER: HAZARDOUS WASTE COMPATIBILITY**

This training section covers the basics of storage compatibility, such as how to safely store hazardous materials, the Department of Defense (DoD) hazardous chemical compatibility system, and Federal Regulations.

*versions: USA*

*average completion time: 20 minutes*

### **RCRA ANNUAL REFRESHER: HAZARDOUS WASTE IDENTIFICATION**

This training section educates on identifying hazardous waste. Other topics include exclusions, listed wastes, contaminated debris and media, the land disposal restrictions program, and descriptions of solid waste and hazardous waste.

*versions: USA*

*average completion time: 20 minutes*

### **RCRA ANNUAL REFRESHER: PERSONAL PROTECTIVE EQUIPMENT (PPE)**

This training section covers the different types of Personal Protection Equipment (PPE) and reasons for their use. Also included is hazard determinations, safety equipment, head, body and respiratory protection, and first aid.

*versions: USA*

*average completion time: 20 minutes*

### **RCRA ANNUAL REFRESHER: STANDARDS APPLICABLE TO GENERATORS**

This training section offers information on the standards important to facility hazardous waste generators, such as different types of generators, Environmental Protection Agency (EPA) requirements for hazardous waste generators, types of accumulation areas, and the requirements for hazardous waste storage containers.

*versions: USA*

*average completion time: 20 minutes*

## **RECURRING WORK PROGRAM (RWP)**

This course is designed for annual validation and covers the Recurring Work Program (RWP), along with the program's value, application and roles.

*versions: Air Force*

*average completion time: 20 minutes*

## **RECYCLING**

This is a general overview of the recycling basics. Topics include “what” recycling and sustainable procurement is and the types of materials that can be recycled.

*versions: General*

*average completion time: 20 minutes*

## **REFRIGERANTS**

This course offers a general familiarization with refrigerants for personnel who maintain, service or repair refrigeration equipment. Specifics include Class II ODS Phase-Out, terms associated with refrigerants, safety precautions when working with refrigerants, and facts, benefits, and challenges of R410A.

*versions: Air Force, Navy, United Kingdom*

*average completion time: 15 minutes*

## **REGULATORY COMPLIANCE TRAINING FOR FIREFIGHTER TRAINING UNIT**

This module targets personnel of SUBASENLON firefighter training facility. Training provides compliance guidance and covers wastewater discharges, wastewater monitoring and reporting, SUBASENLON Reporting Requirements, Industrial Wastewater Notification Requirements, and examples of violations.

*versions: Naval Submarine Base New London (SUBASENLON)*

*average completion time: 20 minutes*

## **REGULATORY COMPLIANCE TRAINING FOR POWER PLANT AND OILY WASTE TREATMENT FACILITY (OWTF)**

This module provides compliance guidance for personnel working in power plants or oily waste treatment facilities. It covers wastewater discharges, wastewater discharge limits, wastewater monitoring and reporting, Industrial Wastewater Notification requirements, air emissions, detailed air emissions information for specific installation equipment, storage tanks, and information on the EMS.

*versions: Naval Submarine Base New London (SUBASENLON)*

*average completion time: 30 minutes*

## **REGULATORY COMPLIANCE TRAINING FOR WASHRACK OPERATION**

This module provides compliance guidance for personnel operating wash racks. It covers wastewater discharges, wastewater monitoring, wash rack log, responsibilities of all personnel, SUBASENLON reporting requirements, Industrial Wastewater Notification Requirements, and examples of violations.

*versions: Naval Submarine Base New London (SUBASENLON)*

*average completion time: 20 minutes*

## **ROAD, PARKING LOT OR AIRFIELD PAVING**

This offers a brief awareness of the compliance requirements for environmental rules and regulations regarding road, parking lot or airfield paving. Targeting those who perform road, parking lot or airfield activities, this covers safety precautions for the activities that can cause human or environmental harm.

*versions: DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **ROOFING**

This offers a brief awareness of the compliance requirements for environmental rules and regulations regarding roofing. Targeting those who perform roofing activities, this covers safety precautions for the activities that can cause human or environmental harm.

*versions: DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **SAFETY MANAGER**

Designed specifically for Air Force Safety Managers, this customized training provides an overview of the information Safety Managers should be aware of, such as responsibilities, the Mishap Prevention Program, AFOSH specific responsibilities, and documentation of training.

*versions: Air Force*

*average completion time: 15 minutes*

## **SELF-HELP PEST MANAGEMENT TRAINING: NUISANCE PESTS**

The goal of this training is to equip personnel who apply pesticide materials with the proper information to do so in a safe and effective manner in accordance with DOD policy. This training provides an understanding of the Integrated Pest Management (IPM) approach to pest management, non-chemical pest control, chemical pest control, routes of pesticide exposure, pesticide labeling, and descriptions and management tips for common nuisance pests.

*versions: General (Includes audio)*

*average completion time: 20 minutes*

## **SELF-HELP PEST MANAGEMENT TRAINING: STINGING INSECTS**

The goal of this training is to equip personnel who apply pesticide materials with the proper information to do so in a safe and effective manner in accordance with DOD policy. This training provides an understanding of the requirements of the Integrated Pest Management (IPM) approach to pest management, pesticide labeling, in-depth descriptions and management tips for common stinging insects, and the use of specific ready-to-use (RTU) aerosol pesticides.

*versions: General (Includes audio)*

*average completion time: 25 minutes*

## **SELF-HELP VEGETATION MANAGEMENT TRAINING**

The goal of this training is to equip personnel who apply herbicide/pesticide materials with the proper information to do so in a safe and effective manner in accordance with DOD policy. This training provides an understanding of the requirements of the Integrated Pest Management (IPM) approach to vegetation pest control, non-chemical and chemical weed control, labeling, description of Glyphosate, routes of exposure, and spill procedure.

*versions: General (Includes audio)*

*average completion time: 20 minutes*

## **SHEET METAL WORK**

This offers a brief awareness of the compliance requirements for environmental rules and regulations regarding sheet metal work activities. Topics include safety information for activities that can potentially cause human or environmental harm.

*versions: DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **SHEETROCK HANGING AND FINISHING**

Targeting personnel who perform sheetrock hanging and finishing activities, this offers a brief awareness of compliance requirements. Safety information is also covered to prevent potential human or environmental harm.

*versions: DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **SMALL ENGINE MAINTENANCE**

This offers a brief awareness of the compliance requirements for environmental rules and regulations regarding small engine maintenance activities. Topics include safety information for activities that can potentially cause human or environmental harm.

*versions: DoD, General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

## **SOLID WASTE**

This training covers an overview of solid waste, including types of waste, solid waste regulations, solid waste disposal, general waste management guidelines, and preparing for solid waste inspections.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DoD, DC, FL, GA, General Overseas, Guam, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, Poland, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **SPILL PREVENTION CONTROL AND COUNTERMEASURES (SPCC)**

This course provides an overview of Spill Prevention Control and Countermeasures (SPCC), the SPCC program, goals of SPCC training, spill prevention and planning requirements, spill prevention, basic spill response expectations, reporting incidental shop spills, hazardous material spills, storage tank requirements, and storage tank discharge.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, Guam, HI, ID, IL, IN, IA, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, Spain, TN, TX, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

## **SPILL PREVENTION CONTROL AND COUNTERMEASURES: OSO DRESDON**

Material covered includes SPCC definition and goals, regulatory background, types of oil regulated under SPCC, container regulations, NUWC Dresden-specific information, SPCC training requirements, spill prevention, spill control, spill response, countermeasures, spill reporting, documentation, notifications, review, security, and common SPCC violations.

*version: Naval Undersea Warfare Center: Division Newport (Specifically for OSO Dresden)*

*average time: 35 minutes*

### **SPILL RESPONSE: NON-EMERGENCY HAZMAT VIDEO TRAINING**

This Spill Response training course offers an overview of procedures for various spill situations. This training also features an informational video that reviews HAZMAT spill discovery and assessment, non-HAZWOPER spill response and incidental release cleanup procedures.

*versions: General*

*average completion time: 20 minutes*

### **STANDARDS APPLICABLE TO GENERATORS**

This training is an overview of the standards important to facility hazardous waste generators, such as the different types of generators, EPA requirements for hazardous waste generators, the types of accumulation areas, and the requirements for hazardous waste storage containers.

*versions: General*

*average completion time: 20 minutes*

### **STORAGE TANKS**

This course educates on storage tank management. Training includes general storage tank information, storage tank regulations, hazardous waste storage tanks, above-ground storage tanks, underground storage tanks, notification requirements, preventing tank spills, discharge, and inspections.

*versions: ROICC Sites: Bahrain, General Overseas, Greece, Guam, Italy, Japan, Korea, Spain, United Kingdom, USA*

*average completion time: 20 minutes*

### **STORMWATER: BASIC INFORMATION**

This course provides a basic overview of information relating to stormwater, such as runoff, major federal stormwater laws, sources of pollution in stormwater runoff, controlling sediments, non-point source pollution, point source pollution, stormwater pollution prevention plans, and stormwater cross connections.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, Guam, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, TN, TX, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

### **STORMWATER: COMPREHENSIVE OVERVIEW**

This training covers everything in the “Basic Information” course, plus NPDES Phase I and II, controlling erosion at construction sites, stormwater permitting, penalties for non-compliance, and stormwater and municipal separate storm sewer systems.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, General Overseas, Greece, HI, ID, Italy, IL, IN, IA, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

### **STORMWATER: EROSION AND SEDIMENT CONTROL**

This is a training series consisting of nine courses providing a comprehensive overview of erosion and sediment control for construction sites and public works maintenance projects. This series targets personnel involved with the planning, design, and construction of sites and land development projects and maintenance of public works projects. These courses cover laws

and regulations, environmental and economic impacts of soil erosion, principles of erosion and sedimentation, erosion and sediment control practices, vegetative stabilization, principles of stormwater runoff, stormwater management best management practices, construction site pollution prevention, and sediment and stormwater plans.

*versions: USA*

*average completion time: 3 hours*

### **STORMWATER—HONOLULU: STORMWATER OVERVIEW**

Designed specifically for the City of Honolulu, this course provides an overview of their stormwater systems and stormwater laws. This training targets all City and County personnel and covers specifics such as their Municipal Separate Storm Sewer System (MS4), illicit discharges and illegal connections, water pollution, federal and state stormwater rules and regulations, the Clean Water Act, enforcement and penalties for stormwater violations, and the National Pollutant Discharge Elimination System (NPDES) permit.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: THE CITY AND COUNTY OF HONOLULU'S SWMP**

Designed specifically for the City of Honolulu, this course provides an overview of their Stormwater Management Program (SWMP) and targets all City and County personnel. This course covers the overall goals of the program, plus the individual elements of the program: public participation and outreach, pollution prevention and good housekeeping, industrial and commercial discharge, monitoring and implementation plans, illicit discharge detection and elimination, post-construction stormwater management, and construction site runoff control.

*versions: Honolulu*

*average completion time: 20 minutes*

### **STORMWATER—HONOLULU: STORMWATER BEST MANAGEMENT PRACTICES PLANNING**

Designed specifically for the City of Honolulu, this course provides an overview of their stormwater management planning. Targeting designers and plans reviewers, this training covers the stormwater management approach, the BMP planning process, stormwater management requirements for developments, permits and BMP plans, and elements of a BMP plan.

*versions: Honolulu*

*average completion time: 15 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR POST-CONSTRUCTION BMPs: SELECTION PROCESS**

Designed specifically for the City of Honolulu, this course provides guidance for selecting best management practices (BMPs) to incorporate into the planning and design of a project. Targeting designers and plans reviewers, this training covers the City and County of Honolulu's BMP Manual for New Development and Redevelopment, the planning approach for BMP selection, and the three step BMP design process of reducing runoff, controlling pollutant sources, and treating polluted runoff.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR POST-CONSTRUCTION BMPs: SITE PLANNING AND DESIGN BMPs**

Designed specifically for the City of Honolulu, this course provides guidance for selecting best management practices (BMPs) to incorporate into the planning and design of a project. Targeting designers and plans reviewers, this training covers pollution

prevention BMPs and site planning and design BMPs.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR POST–CONSTRUCTION BMPs: SOURCE CONTROL BMPs**

Designed specifically for the City of Honolulu, this course provides guidance for selecting best management practices (BMPs) to incorporate into the planning and design of a project. Targeting designers and plans reviewers, this specifically covers source control BMPs.

*versions: Honolulu*

*average completion time: 15 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR POST–CONSTRUCTION BMPs: TREATMENT CONTROL BMPs**

Designed specifically for the City of Honolulu, this course provides guidance for selecting best management practices (BMPs) to incorporate into the planning and design of a project. Targeting all City and County of Honolulu personnel, this training covers the treatment control of BMP design considerations and several treatment control BMPs.

*versions: Honolulu*

*average completion time: 25 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR POST–CONSTRUCTION BMPs: PLAN REVIEW, DOCUMENTATION, OPERATIONS AND MAINTENANCE PLANS**

Designed specifically for the City of Honolulu, this course covers the minimum requirements for best management practices (BMPs) that must be maintained after a construction project has been completed. This course targets designers and plans reviewers and covers types of BMPs, tracking BMPs, and the BMP information which must be provided to the City and County of Honolulu Operating Department.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR CONSTRUCTION BMPs: PLANS, PERMITS AND SITE REQUIREMENTS**

Designed specifically for the City of Honolulu, this course covers the minimum stormwater requirements for best management practices (BMPs) that must be maintained by construction projects. This course targets designers and plans reviewers and covers administrative requirements, Erosion Control Plans, NPDES General Permit coverage and Notice of Intent (NOI), contract documents for Capital Improvement Plan (CIP) projects, and enforcement actions for non-compliance.

*versions: Honolulu*

*average completion time: 15 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR CONSTRUCTION BMPs: SELECTION PROCESS**

Designed specifically for the City of Honolulu, this course provides an overview of the selection process for best management practices (BMPs) that must be maintained by construction projects. This course targets designers and plans reviewers and covers the City and County of Honolulu's BMP Manual for Construction Sites and the three step BMP selection process of defining, identifying, and selecting BMPs.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR CONSTRUCTION BMPs: EROSION AND WIND CONTROLS**

Designed specifically for the City of Honolulu, this course provides an overview of best management practices (BMPs) to use for wind and erosion control construction projects. This course covers scheduling, vegetative stabilization, mulch, geotextiles and mats, earth dikes and drainage swales, slope drains, velocity dissipation devices, and wind erosion control.

*versions: Honolulu*

*average completion time: 15 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR CONSTRUCTION BMPs: SEDIMENT CONTROLS**

Designed specifically for the City of Honolulu, this course provides an overview of best management practices (BMPs) to use for controlling sediment construction projects. This course targets designers and plans reviewers and covers silt fence, linear control measures, fiber rolls, check dams, sediment traps, sediment basins, and storm drain inlet protection.

*versions: Honolulu*

*average completion time: 15 minutes*

### **STORMWATER—HONOLULU: DESIGN CONSIDERATIONS FOR CONSTRUCTION BMPs: TRACKING CONTROLS AND GOOD HOUSEKEEPING**

Designed specifically for the City of Honolulu, this course provides an overview of best management practices (BMPs) to use for controlling tracking from the site and maintaining good housekeeping. This course targets designers and plans reviewers and covers stabilized construction entrances and exits, stabilized construction roadways, non-storm water discharges, and waste management and materials pollution control.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: INSPECTION CONSIDERATIONS FOR CONSTRUCTION BMPs: PLANS, PERMITS AND SITE REQUIREMENTS**

Designed specifically for the City of Honolulu, this course provides an overview of the minimum stormwater requirements for best management practices (BMPs) that must be maintained for construction projects. This course targets inspectors and construction managers and covers administrative requirements, Erosion Control Plans, NPDES General Permit coverage and Notice of Intent (NOI), contract documents for Capital Improvement Plan (CIP) projects, and enforcement actions for non-compliance.

*versions: Honolulu*

*average completion time: 15 minutes*

### **STORMWATER—HONOLULU: INSPECTION CONSIDERATIONS FOR CONSTRUCTION BMPs: CORRECT INSTALLATION AND MAINTENANCE OF COMMON SITE BMPs**

Designed specifically for the City of Honolulu, this course provides an overview of best management practices (BMPs) used during construction and overall guidelines for their maintenance. This course targets inspectors and construction managers and covers scheduling, vegetation, mulch, geotextiles and mats, slope drains, velocity dissipation devices, silt fence, storm drain inlet protection, sediment traps and basins, wind erosion control, tracking control, vehicle and equipment management,

concrete management, and good housekeeping.

*versions: Honolulu*

*average completion time: 20 minutes*

### **STORMWATER—HONOLULU: INSPECTION CONSIDERATIONS FOR CONSTRUCTION BMPs: INSPECTION AND ENFORCEMENT PROCEDURES**

This course provides an overview of the inspection and enforcement program for construction projects within the City and County of Honolulu. Designed to target inspectors and construction managers, this covers inspection responsibilities, minimum requirements for construction activities, inspections of best management practices (BMPs), inspection frequency, documentation, violations, illicit discharges, contract acceptance, and project closeout.

*versions: Honolulu*

*average completion time: 15 minutes*

### **STORMWATER—HONOLULU: MUNICIPAL MAINTENANCE ACTIVITIES: GOOD HOUSEKEEPING**

This course provides an overview of pollution prevention and good housekeeping for municipal operations while working within the City and County of Honolulu. Designed to target municipal maintenance personnel, this course educates on employee training, labels, material safety data sheets, storage areas, material use and supply, managing hazardous material, managing waste, operating and maintaining equipment and vehicles, managing spills, and stormwater within work areas.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: MUNICIPAL MAINTENANCE ACTIVITIES: ILLICIT DISCHARGES AND ILLEGAL CONNECTIONS**

This course provides a brief overview of the City and County of Honolulu's illicit discharge and illegal connection program. This awareness training targets municipal maintenance personnel and goes over illicit discharge and illegal connection definitions, detection, removal of, and reporting of illicit discharges and illegal connections to the City and County of Honolulu's municipal separate storm sewer system.

*versions: Honolulu*

*average completion time: 5 minutes*

### **STORMWATER—HONOLULU: MUNICIPAL MAINTENANCE ACTIVITIES: LANDSCAPE MAINTENANCE BMPS**

This course offers an overview of best management practices (BMPs) to use while maintaining landscape within the City and County of Honolulu. This training targets municipal maintenance personnel and covers planting, irrigation, vegetation control, green waste, integrated pest control, container labels, material safety data sheets, pesticide application, and fertilizer application.

*versions: Honolulu*

*average completion time: 20 minutes*

### **STORMWATER—HONOLULU: MUNICIPAL MAINTENANCE ACTIVITIES: MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) MAINTENANCE BMPS**

This course offers an overview of best management practices (BMPs) to use while maintaining the City and County of Honolulu's MS4. This course targets municipal maintenance personnel and covers inspection of the MS4 and its components, inspection for debris, illicit discharges and illegal connections, cleaning of drainage structures, and reporting MS4 issues that

require attention.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: MUNICIPAL MAINTENANCE ACTIVITIES: PAVEMENT MAINTENANCE BMPS**

This course offers an overview of best management practices (BMPs) to use while maintaining pavement or performing small pavement related construction projects within the City and County of Honolulu. This course targets municipal maintenance personnel and covers pavement cleaning methods, using leaf blowers, power washing, wash water disposal, street sweeping, minor construction activities, material and equipment supply and storage, and handling waste.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: MUNICIPAL MAINTENANCE ACTIVITIES: SPILL MANAGEMENT**

This course offers an overview of preventing and managing spills within the City and County of Honolulu. This course targets municipal maintenance personnel and educates on spill preparedness, spill prevention, spill response, spill cleanup methods, disposal of spill materials, reporting spills, and responding to spill and leaks in the field.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER—HONOLULU: MUNICIPAL MAINTENANCE ACTIVITIES: VEHICLE AND EQUIPMENT MAINTENANCE BMPS**

This course offers an overview of best management practices (BMPs) to use while maintaining vehicles and equipment within the City and County of Honolulu. This training targets municipal maintenance personnel and covers routine practices, general maintenance and repairs, equipment cleaning, handling waste, recycling, washing vehicles, and fueling.

*versions: Honolulu*

*average completion time: 10 minutes*

### **STORMWATER GENERAL AWARENESS**

This course provides an overview of stormwater, its importance and protection, basic laws governing stormwater pollution, identifying construction site pollutants and how to implement BMPs, and identifying and reducing residential pollutants.

*versions: Installation Specific*

*average completion time: 15 minutes*

### **STORMWATER LOW IMPACT DEVELOPMENT (LID)**

This training provides an overview of low impact development for stormwater and educates on the purpose and benefits of LID, federal LID requirements, and provides examples of LID techniques.

*versions: Installation Specific*

*average completion time: 20 minutes*

### **STORM WATER POLLUTION PREVENTION TRAINING**

This training targets all personnel and contractors working in jobs where stormwater pollution might be an issue, such as storage area jobs, fueling, equipment maintenance, waste management, sanitary sewers, and construction. Module content

covers NAS Corpus Christie stormwater permits, Best Management Practices (BMPs) to prevent pollution, examples of pollution, contact information, and specific BMPs for construction sites, concrete projects, painting and paint removal.

*versions: Naval Air Station Corpus Christi*

*average completion time: 30 minutes*

## **SUBMARINE MAINTENANCE**

Targeting personnel who maintain submarine vehicles, this training provides a quick overview of the submarine maintenance activities which can cause harm to the environment or people working in that area.

*versions: General*

*average completion time: 5 minutes*

## **SUSTAINABLE ENVIRONMENTAL MANAGEMENT (SEM)**

This course is awareness training on the use of SEM as a management tool to help achieve sustainability. Topics covered include development of environmental policy statements, explanation of environmental aspects and impacts, developing environmental objectives and targets, and operational controls. The training includes specific examples of things that individuals and corporations can do to reduce environmental impacts, including modifications to supply chain management and incorporation of life cycle management strategies.

*versions: General*

*average completion time: 30 minutes*

## **SUSTAINABLE PROCUREMENT PROGRAM (SPP) AWARENESS**

An overview of what the Sustainable Procurement Program (SPP) is and how to implement it. This module reviews the following: SPP definition and objectives, SPP background, SPP benefits, SPP policy, who is responsible for sustainable procurement, SPP laws and regulations, the thirteen components of SPP, recycled-content products designated by EPA, the Comprehensive Procurement Guideline (CPG), energy and water efficient products, DoD purchases, alternative fuels and alternative fuel vehicles, biobased products, non-ozone depleting substances, environmentally preferable products and services, EPP, safer choice chemicals, mandated supply sources, purchase documentation requirements, reporting, corrective action, and how to find green products.

*versions: Air Force (Includes audio)*

*average completion time: 20 minutes*

## **THREATS TO AMPHIBIANS AND REPTILES**

Developed for the Department of the Navy, this training introduces personnel to the variety of threats facing amphibians and reptiles. It encourages a proactive approach to identifying and alleviating the impact of threats such as habitat loss, exploitation, disease, pollution, invasive species, and climate change. Sources that provide more detailed information on these threats are identified.

*versions: General (Includes audio)*

*average completion time: 20 minutes*

## **UNIT ENVIRONMENTAL COORDINATOR (UEC)**

This Unit Environmental Coordinator (UEC) training series consists of 16 courses and provides an overview of environmental issues for Air Force UECs. This training targets new and existing Air Force UECs and covers important environmental topics such as air emissions, Environmental, Safety and Occupational Health (ESOH) Compliance Assessment Management Program, fire protection, hazardous materials management, hazardous materials spills, hazardous waste management,

HAZMAT Shelf-Life Management Program, National Environmental Policy Act (NEPA) Compliance, natural and cultural resource protection, pesticides, pollution prevention, solid waste management, special programs, and training and occupational health exams.

*versions: Air Force*

*average completion time: 3 hours*

## **UNIVERSAL WASTE**

Designed specifically for Minot Air Force Base, this course offers a general familiarization with universal waste. Targeting office personnel and those who are not required to receive hazardous waste training, this educates on topics such as universal waste definitions, management guidelines for universal waste at Minot Air Force Base, and common universal wastes that may be encountered at Minot Air Force Base.

*versions: Air Force*

*average completion time: 10 minutes*

## **USED OIL AND ORGANIZATIONAL TANK CUSTODIAN**

Designed for Columbus Air Force Base, this course covers responsibilities of the tank custodian, types of organizational tanks, protocol for establishing used oil tanks, product and safety markings, safety and environmental guidelines, leak detection, and checklists.

*versions: Air Force*

*average completion time: 20 minutes*

## **UST CLASS A/B CERTIFICATION TRAINING: 9 PART SERIES - NEW STATES ADDED!**

This certified and state-approved training series includes 9 modules that thoroughly cover topics such as: UST Class A/B operator training roles, responsibilities, and requirements, underground storage tanks (USTs) and their qualities, spill and overfill prevention, devices, and correct filling practices, release detection and inspections, corrosion control, UST financial requirements and scope of coverage required, temporary and permanent tank closure, emergency response with short and long-term actions, and recordkeeping and reporting.

*versions: Connecticut, District of Columbia, Florida, Georgia, Hawaii, Illinois, Pennsylvania, Washington, West Virginia*

*average completion time: 20 minutes for each module*

## **UST CLASS A/B CERTIFICATION TRAINING: 11 PART SERIES - NEW STATES ADDED!**

This in-depth training series is certified and state-approved. Included in this training are 11 modules that thoroughly cover topics such as: UST Class A/B operator training roles, responsibilities, and requirements, underground storage tanks (USTs) and their qualities, spill and overfill prevention, devices, and correct filling practices, release detection and inspections, corrosion control, UST financial requirements and required scope of coverage, temporary and permanent tank closure, emergency response with short and long-term actions, registration requirements, inspection requirements, and recordkeeping and reporting.

*versions: Maryland, Virginia*

*average completion time: 20 minutes for each module*

## **UST CLASS A/B PREPARATORY PROGRAM: 9 PART SERIES - NEW!**

This 9 module curriculum prepares you for the UST Class A/B Operator Exam. Individual modules cover topics such as: UST operator training requirements, state program requirements, Class A, B, & C operator responsibilities and training, underground storage tanks (USTs) and qualifications, common construction materials, product compatibility, spill and overfill prevention and its importance, correct UST filling practices, spill prevention equipment and requirements, overfill prevention

requirements, release detection, secondary containment with interstitial monitoring, release detection requirements and spill detection inspections, corrosion control and cathodic protection, UST financial requirements, temporary and permanent tank closure, emergency response, spill/leak short and long-term actions, and recordkeeping and reporting.

*versions: California, New York*

*average completion time: 20 minutes for each module*

### **UST CLASS C CERTIFICATION TRAINING: 5 PART SERIES - NEW STATES ADDED!**

This Class C training series is certified and state-approved. The training curriculum includes 5 modules and covers an introduction to Class C Operators, UST System Components, Spill and Overfill Prevention, Emergency Response, and Cleanup.

*versions: Connecticut, District of Columbia, Florida, Georgia, Hawaii, Illinois, Maryland, Mississippi, Washington*

*average completion time: 10 minutes for each module*

### **UTILITY PLANT AIR COMPLIANCE TRAINING**

The purpose of the training is to describe the applicable requirements for each of the regulated emission sources at the Utility Plant and to define the responsible party for each requirement. The requirements listed in this training are necessary to comply with all known applicable State and Federal regulations.

*versions: Subase New London specific*

*average completion time: 30 minutes*

### **VEHICLE CONTROL OFFICER (VCO)**

This training offers an overview of the Vehicle Control Officer (VCO) program and general important issues for the VCO, such as roles and responsibilities, procedures and protocols, and guidance for meeting mission requirements for vehicle control and transportation services.

*versions: PACAF*

*average completion time: 10 minutes*

### **VEHICLE MAINTENANCE**

This is a brief awareness of environmental compliance rules and regulations for personnel who perform vehicle maintenance activities which can cause human or environmental harm.

*versions: General Overseas, Greece, Japan, Korea, United Kingdom*

*average completion time: 5 minutes*

### **WASTE MANAGEMENT GUIDELINES**

This training covers guidelines for managing regulated waste and targets personnel who perform activities which may generate waste. Topics include wastes requiring special management such as fluorescent bulbs, antifreeze, batteries, caulking, paint, and used oil.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, Poland, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR HVAC WASTE**

This training covers guidelines for managing typical wastes generated from heating, refrigeration and air conditioning activities. Topics covered include waste requiring special requirements, batteries, caulking, rags, aerosol cans, and empty containers.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR AIRCRAFT MAINTENANCE WASTE**

This training covers guidelines for managing typical wastes generated from aircraft maintenance activities. Topics include wastes requiring special management, antifreeze, batteries, caulking, paint, used oil, aerosol cans, blast media, and absorbent material.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR BUILDING CONSTRUCTION WASTE**

This training covers guidelines for managing typical wastes generated from building construction activities. Topics include wastes requiring special management, batteries, caulking, paint guidelines, rags, aerosol can guidelines, absorbent material requirements, and empty container information.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR BUILDING DEMOLITION WASTE**

This training covers guidelines for managing typical wastes generated from building demolition activities. Topics include wastes requiring special management, hazardous waste from construction sites, guidelines for fluorescent bulbs, used oil requirements, batteries, absorbent material guidelines, and empty container information.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR BUILDING MAINTENANCE WASTE**

This training covers guidelines for managing typical wastes generated from building maintenance activities. Topics include wastes requiring special management, guidelines for mercury-containing bulbs and devices, guidelines for fluorescent bulbs, guidelines for paint operations, batteries, caulking, used rags guidelines, aerosol can disposal guidelines, cleaning and degreasing solvents, adhesives and glues guidelines, pesticide disposal, absorbent material guidelines, and empty container information

*versions: RI, USA*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR BUILDING RENOVATION WASTE**

This training covers guidelines for managing typical wastes generated from building renovation activities. Topics include wastes requiring special management, guidelines for fluorescent bulbs, batteries, caulking, paint guidelines, rags, aerosol can guidelines, blast media requirements, and hazardous waste from construction sites.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR CARPET AND TILE INSTALLATION WASTE**

This training covers guidelines for managing typical wastes generated from carpet and tile installation activities. Topics include wastes requiring special management, hazardous waste from construction sites, caulking, rags, aerosol can management, absorbent materials management, and empty container requirements.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR CARPENTRY WASTE**

This training covers guidelines for managing typical wastes generated from carpentry activities. Topics include wastes requiring special management, hazardous waste from construction sites, caulking, aerosol can management, paint guidelines, rags, and empty container requirements.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 10 minute*

## **WASTE MANAGEMENT GUIDELINES FOR ELECTRICAL WASTE**

This training covers guidelines for managing typical wastes generated from electrical activities. Topics include wastes requiring special management, fluorescent bulb management, and battery guidelines.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 10 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR FIRE ALARM SYSTEM REPAIR WASTE**

This training covers guidelines for managing typical wastes generated from fire alarm repair activities. Topics include wastes requiring special management, batteries, empty containers, and recyclable mercury-containing devices.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 10 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR LABORATORY AND PHARMACY WASTE**

This training covers guidelines for managing typical wastes generated from laboratory and pharmacy activities. Topics include

wastes requiring special management, laboratory waste requirements, radioactive mixed waste guidelines, pharmaceutical waste requirements, and empty containers.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, General Overseas, Greece, HI, Italy, ID, IL, IN, IA, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR LANDSCAPING WASTE**

This training covers guidelines for managing typical wastes generated from landscaping activities. Topics include wastes requiring special management, guidelines for used oil, used rags and gasoline, batteries, aerosol can disposal guidelines, cleaning and degreasing solvents, pesticide disposal, absorbent material guidelines, and empty container information.

*versions: ROICC: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, TN, TX, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR PAINT WASTE**

This training covers guidelines for managing typical wastes generated from painting activities. Topics include wastes requiring special management, caulking, oil based paint, latex paint, paint containing lead, rags, aerosol cans, blast media, and empty containers.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 20 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR SMALL ENGINE MAINTENANCE WASTE**

This training covers guidelines for managing typical wastes generated from small engine maintenance activities. Topics include wastes requiring special management, used oil requirements, antifreeze guidelines, batteries, rags, gasoline requirements, aerosol can guidelines, absorbent materials guidelines, and empty cans.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*

*average completion time: 15 minutes*

## **WASTE MANAGEMENT GUIDELINES FOR SUBMARINE MAINTENANCE WASTE**

This training covers guidelines for managing wastes generated from submarine maintenance activities. Topics include wastes requiring special management, mercury-containing bulbs and devices, fluorescent bulbs, cathode ray tubes, used oil, antifreeze, batteries, caulking, management of paints and painting operations, rags, gasoline, aerosol cans, solvents for cleaning and degreasing, adhesives, glues, sealants, blast media disposal, absorbent material, and empty containers.

*versions: CT*

*average completion time: 15 minutes*

## **WASTEWATER**

This is an introduction to wastewater and educates on general wastewater information, wastewater permit requirements, wastewater discharges requiring a permit, wastewater treatment plants, well-pointing, and accidental sewage discharges.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, DoD, FL, GA, General Overseas, Greece, Guam, HI, ID, IL, IN, IA, Italy, Japan, KS, KY, Korea, LA, ME, MD, MA, MN, MS, MT, Navy, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, Spain, TN, TX, United Kingdom, USA, UT, VT, VA, WA, WV, WI, WY*  
*average completion time: 15 minutes*

## **WASTEWATER REGULATORY COMPLIANCE TRAINING: SUBASENLON FIRE DEPARTMENT**

This module provides wastewater compliance guidance for personnel in the SUBASENLON Fire Department. It covers the variety of wastewater discharge sources & circumstances, regulatory oversight, and compliance issues.

*versions: SUBASENLON specific*  
*average completion time: 25 minutes*

## **WATER**

This course provides an overview of water regulations. Additional topics included the purpose of water regulations, overview of federal water laws, and descriptions of key water laws.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, TX, USA, UT, VT, VA, WA, WV, WI, WY*  
*average completion time: 10 minutes*

## **WELDING**

This is a brief awareness course that covers compliance requirements for environmental rules and regulations. Targeting personnel involved with welding activities, this goes over the welding activities that could potentially cause human or environmental harm.

*versions: DoD, General Overseas, Greece, Japan, Korea, United Kingdom*  
*average completion time: 5 minutes*

## **WETLANDS**

This course is an overview of wetlands and educates on general wetland information, wetlands laws, working near wetlands, wetland permit requirements, agencies involved with wetlands, and protecting wetlands while working.

*versions: AL, AK, AZ, AR, CA, CO, CT, DE, DC, FL, GA, Guam, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, TN, TX, USA, UT, VT, VA, WA, WV, WI, WY*  
*average completion time: 15 minutes*

## **WETLANDS GENERAL AWARENESS**

This training educates on general wetlands awareness. Additional topics include the importance of wetlands, their protection, basic laws governing wetlands, and identifying construction site Best Management Practices (BMPs) and their implementation.

*versions: Installation Specific*  
*average completion time: 15 minutes*

## **WINDOW GLAZING**

This is a brief awareness of the compliance requirements for environmental rules and regulations related to window glazing activities. Topics include the window glazing activities that could potentially cause human or environmental harm in the work area.

*versions: DoD, General Overseas, Greece, Japan, Korea, United Kingdom*  
*average completion time: 5 minutes*
