# Radon Assessment and Mitigation Program Training

This training is provided to supplement available Navy guidance on radon and includes nine topic-specific modules. Each module includes audio, interactive knowledge checks, graphs, diagrams, images, and a quiz at the end.

## overview of the training modules

1. **Radon and its Health Risks:** What radon is, where it comes from, and exposure risks
2. **Navy Radon Policy:** Outline of Navy radon policy as established in OPNAV M-5090.1
3. **NAVRAMP Testing Phases:** Required installation radon testing as established by OPNAV M-5090.1
4. **General Overview of Radon Testing:** Overview of EPA Radon action levels, radon testing devices, and basic quality assurance and quality control in radon measurements
5. **NAVRAMP Radon Testing:** Navy-specific radon testing requirements and how to estimate number of rooms to test
6. **Health Risk Communication:** Overview of radon health risk communication
7. **Radon Mitigation Overview:** General overview of radon mitigation and Radon Resistant New Construction (RRNC) techniques
8. **NAVRAMP Mitigation:** Navy-specific radon mitigation and RRNC requirements
9. **Radon Management Plan:** Basic elements of an installation radon management plan

## how to use the training

- Each module is topic specific. Participants are **not** required to take all the training in sequence or in a particular order.
- Each training module is designed to take <30 minutes for the average trainee.
- This training is for **informational purposes only** and should not be considered a certification course.
