hello fall

ECATTS

Training Spotlight

New Courses Added! We are always working on new training modules to add to your site's portfolio. Take a look at what's been added recently.

Lead and Copper Rule:

This training is an overview of the Lead and Copper rule. Topics covered include Health Effects, LCR History, Monitoring, Public Notice, and Excess Requirements. It includes a video and knowledge checks to assist with your learning.

UST Class A/B Preparatory Program:

This preparatory curriculum for the state of Louisiana includes 9 modules and covers topics such as:

- UST Operator Training Requirements
- Underground Storage Tanks
- Spill and Overfill Prevention
- Release Detection
- Corrosion Control
- UST Financial Requirements
- Temporary and Permanent Tank Closure
- Emergency Response
- Recordkeeping and Reporting

More UST training to come!

Alaska News

Alaska is one of the first six states to receive approval for the NEPA Assignment Program. Through this program, project reviews are streamlined and the Alaska DOT&PF assumes responsibilities under NEPA and all or part of FHWA's responsibilities for environmental review, consultation, or other actions required under any Federal environmental law for federally funded highway projects in Alaska.

ECATTS has added NEPA Assignment Program training to the Alaska DOT&PF training site. The training reviews NEPA, the NEPA Review Process, and presents the requirements for preparing and processing environmental documentation for the NEPA Assignment Program. It is intended to be used in conjunction with AKDOT&PF Environmental Procedures Manual.

Course Developments

We are currently in the process of developing new training for The Revised Total Coliform Rule (RTCR). The RTCR is the revision to the 1989 Total Coliform Rule (TCR) that applies to all public water systems. This training will explain contaminate levels, monitoring requirements, Level 1 and 2 assessments and corrective actions, reporting and recordkeeping, violations, public notification and consumer confidence reports.

Fall Support Tip

Are you getting the most out of your base's ECATTS system? ECATTS has a wide variety of features designed to simplify your training and recordkeeping on base. If you are an administrator, check out the Admin User Manual located in the top blue navigation panel on the Admin home page for detailed descriptions of all available features. Training Managers can find a similar manual on the Training Manager home page.

Keep an eye out for upcoming training webinars which will provide you with an in-depth look at some of our more popular features. If you have an idea for a training webinar topic or need any other assistance, just contact us at **support@ecatts.com**. We are always happy to help.
