

ECATTS' Film Debut

ECATTS hits the 'big' screen! Your training has recently been featured in a video filmed and published by NAVFAC highlighting the benefits of using the system to maintain your environmental compliance.

"I strongly encourage you to use ECATTS as one of your training resources to better understand our responsibility to preserving our ecosystem where we train and operate."

– NAVFAC Commander, RADM Bret Muilenburg

The video is now up and available for viewing prior to your ECATTS site login. Be sure to watch at environmentaltraining.ecatts.com.

NEW!

Training Spotlight

We've been busy adding new modules for your training benefit. Look for the following on your site:

Introduction to Drinking Water: This 9 part series is an overview of issues and components pertaining to drinking water systems. Examples of topics covered include Safe Drinking Water Act, application of drinking water standards, the role of the states in Regulating Drinking Water, public water systems classifications, NPDWRs, Secondary Drinking Water Regulations, Exemptions, Testing, and Navy policy, contaminants and water protection, State requirements for water quality, treatment methods, distribution, Emergency Response Plan and necessary actions, and best management practices.

UST Class A/B Preparatory Program (states of California & New York): This 9 module curriculum provides an overview of UST operator roles, responsibilities, and requirements and prepares you for the UST Class A/B Operator Exam.

UST Class A/B Operator Certification Training (states of Maryland, Virginia, & Washington): Includes 9-11 modules thoroughly covering topics such as training requirements, spill and overflow prevention, release detection, corrosion control, financial requirements, emergency response, inspection requirements, and recordkeeping and reporting to name a few.

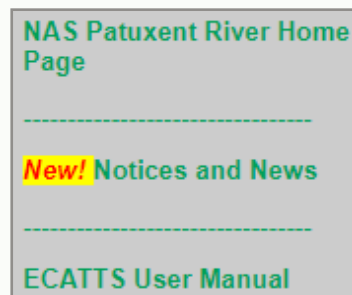

Log into your ECATTS training site to access and start your training now.

Spring Support Tip

Are you getting the most out of your base's ECATTS system? Make sure you are by scheduling a one-on-one tutorial with our Customer Service Department. We will walk you through the main features of your ECATTS site and help you customize the site to best meet your needs. We will also help you utilize the system's reporting features to their fullest. Email us at support@ecatts.com to schedule your tutorial.

Notification Feature Added

Wondering if there's anything new at your installation or nation-wide? We've recently added a tag feature to showcase any "new" notices on your homepage! These "New!" tags can be seen next to your "Notices and News" link in the left hand menu of your main screen so you can now be notified of any recent activity.

Training Via Briefing

Did you know that features exist within your ECATTS platform that allow you to collect and store training data for people who do not have an account or access to computers? The "Training Via Briefing" feature located in the Training Manager area allows TMs to log and report training taken offline to ensure everyone gets the training they need regardless of location or computer access.

Later this month, our own Sarah Spalding, Customer Support Manager, will host a webinar showcasing the capabilities of the system. Additional information will be provided to base POCs as the date for this webinar approaches. If you are not a base POC in ECATTS but would like to be included on the webinar, please email support@ecatts.com and we will be happy to email you an invitation.

For more information on our "Training Via Briefing" feature, email support@ecatts.com.

happy spring
